

Teltonika ModemCOM/G10

Good speed for reasonable price.

Be advanced by staying online wherever you are!

Manage your business in real-time!

Send and receive E-Mails!

Browse WEB database!

Access VPN!

Send SMS messages from your PC or server!

Teltonika ModemCOM/G10 is a simple, but powerful tool for wireless connection of personal or industrial computer to the Internet. This device acts like an ordinary modem, controlled by AT commands, so almost no changes would be required, if you used a fixed line modem before and want to upgrade to wireless modem.

Real-time business transaction, sending and receiving e-mails, browsing WEB database, accessing VPN and sending SMS messages from your PC or server - all in your hand! With the help of Teltonika ModemCOM/G10, you can maintain your top mobility, easy access to the Internet no matter you are in a train, bus, or in a car.

Unlike PCMCIA modems, Teltonika ModemCOM/G10 can be connected not only to notebook, but to any PC having COM support.
