

USER MANUAL

PENTHA GB2 MONITOR

INTRODUCTION

First of all, we thank and congratulate you for purchasing this product.

Our commitment to achieving the satisfaction of customers like you is manifested through our ISO-9001 certification and the manufacture of products like the one you have just purchased.

Its advanced technology and strict quality control will ensure that customers and users enjoy the numerous features that this device offers. To get the most out of them and ensure proper operation from day one, we recommend that you read this instruction manual.

SAFETY PRECAUTIONS

- Avoid overtightening the screws of the monitor's wall mounting connector.
- **Always disconnect the power supply** before making modifications to the device.
- The fitting and handling of these devices must be carried out by **authorised personnel**.
- All of the wiring must run at least **40cm away from any other wiring**.
- Install the monitor in a dry protected location free from the risk of dripping or splashing water.
- Do not place in humid, dusty or smoky locations, or near sources of heat.
- Before connecting the device to the mains, check the connections between the door panel, power supply, distributors and monitors.
- Always follow the instructions contained in this manual.

CHARACTERISTICS

- Hands-free monitor.
- 7" TFT colour screen.
- Monitor with simple installation (non-polarised 2 wire BUS).
- The PENTHA GB2/H monitor interacts with hearing aids equipped with T-mode, making conversation between the door panel and apartment easier.
- Capacitive menu access and (slave monitor only) start/stop communication button.
- Touch screen for access and selection of menu functions:

User menu:

- Displaying door panel images.
- Displaying camera pictures (DQ-CAM-GB2 module required).
- Sending and receiving text messages from the same apartment and other apartments in the building.
- Viewing photos or videos of missed calls (microSD card up to 16 GB and Class 10 required).
- Door panel or intercom call log (received and made).
- Intercom calls within the same apartment.
- Intercom calls between apartments.
- Call to guard.
- Activating external light (SAR-GB2 module required).
- About: Information, access to the installer menu and default settings (restore).
- Settings: Ringtone, ringtone volume, date / time, language and enabling intercom between apartments.

Installer menu:

- Monitor as master or slave 1, slave 2 or slave 3. Up to 4 monitors per apartment.
- Enabling the menu to be viewed when the Bus is busy.
- Enables the monitor address to be programmed from the installer menu.

Screen, volume and control settings menu: (during auto switch-on or communication).

- Manual photo or video recording (microSD card up to 16GB and Class 10 required).
- Door 1 opening control / door 2 opening control.
- Start/stop communication control.
- External light control (SAR-GB2 module required).
- Scene: Normal, bright, soft or user picture.
- Brightness, contrast and colour.
- Screen format (4:3, 16:9 wide and 16:9 high).
- Displaying camera pictures (DQ-CAM-GB2 module required).
- Different ringtones to identify the origin of the call (door panel, intercom or apartment door).
- DIP switches for setting the monitor address (call code) and end of line.
- Input for call from the apartment door.
- SAR-12/24 call repeater output (12Vdc/50mA maximum).

SYSTEM OPERATION

- To make a call, the visitor must press the button of the apartment; an audible sound indicates that the call is being made and LED  will turn on. If vocal synthesis is enabled, a 'Call is in progress' message appears indicating that a call is being made. At this moment, the apartment's monitors receive the call. If another apartment is called by mistake, press the button for the correct apartment and the first call will be cancelled.
- The call lasts for 40 seconds and, when received, the image appears on the master monitor without the visitor knowing. To view the image on a slave monitor, this function needs to have been enabled on the monitor. House kit application: the image appears on the monitor (with code 0 'apartment 1' or monitor with code 16 if the call is in 'apartment 2') when receiving the call without the visitor being alerted. If the call is not answered within 40 seconds, LED  will turn off and the channel will be freed.
- To establish communication, press option  on the screen of the master monitor or the  logo on the front of any slave monitor in the apartment (unless the 'display image in call' function is enabled on the slave monitor, in which case, option  must be pressed), and LED  on the door panel will illuminate. If the monitor is a PENTHA GB2/H with icon  on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.
- Communication will last for one and a half minutes or until option  on the monitor screen is pressed. When communication has finished, LEDs  and  will turn off and the channel will be freed. If vocal synthesis is enabled, a 'Communication is finished' message will indicate that the call is over.
- To open door 1 or 2, press option  /  on the monitor screen during the call or communication processes: one press will activate the lock release for 5 seconds and LED  will also illuminate for 5 seconds. If vocal synthesis is enabled, a 'Door Opened!' message will be indicated on the door panel.
- The description of the function push button and LEDs can be found on p. 4.

DESCRIPTION OF THE MONITOR

- a. Microphone.
- b. Monitor status light and capacitive menu access (in standby) / slave monitor communication start button.
- c. Communication with hearing aids (PENTHA GB2/H). Set the hearing aid switch to T-mode, see p. 8.
- d. Speaker.
- e. 7" TFT colour screen.

- f.. 'Do not disturb' mode LED.
- g. 'Divert call' mode LED.
- h. Vertical wiring entry.
- i. Connector fixings.
- j. Connector.
- k. DIP switch.
- l. Bus connection terminals.

LEDS:

- 'Divert call' mode LED:**
Off: 'Divert call' mode disabled.
On: 'Divert call' mode enabled.
- 'Do not disturb' mode LED:**
Off: 'Do not disturb' mode disabled.
On: 'Do not disturb' mode enabled.

Function push button / Monitor status light:

Function push button: Menu access (in standby) / During a call process, it initiates communication in a slave monitor (unless the 'display image in call' function is enabled - see 'System operation' on p. 3).

Monitor status light:

Standby: Light fixed (low intensity).
Call: Light blinking.
Communication: Light fixed.
Missed call: Low and variable intensity light.

Connection terminals and DIP switch:

Connection terminals:

- L1, L2: Bus connection (non-polarised).
- HZ+, HZ-: Door bell connection.
- CALL REPEATER, GND: Call repeater connection (SAR-12/24). (12Vdc/50mA maximum).

Configuration DIP switch:

DIP 6: Configures the end of line. Leave in the ON position in monitors where the bus cable terminates. Set to OFF in intermediate monitors only.

DIP 1 to DIP 5: To set the monitor address (addresses 0 to 31).

The switches set to OFF have a zero value.
The values of the switches set to ON are shown in the table below.
The monitor code is the sum of the values of the switches set to ON.

Table of values

Switch n°:	1	2	3	4	5
Value when ON:	1	2	4	8	16

Example: 0 + 0 + 4 + 0 + 16 = 20

- (WHITE): HZ+
- (GREEN): HZ-
- (RED): CALL REPEATER
- (BLACK): GND
- (YELLOW): DO NOT USE

DESCRIPTION OF THE MONITOR

Setting the monitor's address codes (addresses 0 to 31):

DIP 6: Configures the end of line. Leave in the ON position in monitors where the video cable terminates. Set to OFF in intermediate monitors only.

DIP 6 to ON

DIP 6 to OFF

DIP 1 to DIP 5: To set the monitor address (addresses 0 to 31).

Code 0/32 (*)

(*) Important:

- In door panel systems with call buttons, the first address on the monitor is 'Code 0'.
- In coded panel systems (N3301/GB2), 'Code 0' is 'Code 32', which means that when a call is made to a monitor with 'Code 0' (DIP 1 to DIP 5 set to OFF), it needs to be entered    on the N3301/GB2 numeric keypad.
- In the software (Address Manager GB2), 'Code 0' is also shown as 'Code 32'.

INSTALLING THE MONITOR IN A WALL MOUNTING CONNECTOR

Avoid dusty or smoky environments or locations near sources of heat.

Positioning the wall mounting connector:

The top of the connector must be positioned at a height of 1.60m. The minimum distance between the sides of the connector and the closest object must be 5cm.

Fixing the monitor's wall mounting connector to the wall:

Fix the monitor's wall mounting connector to the wall by drilling two 6mm diameter holes and using the screws and plugs supplied with the monitor.

Positioning the monitor:

Connect the cables to the monitor (see p. 4), position the monitor in front of the wall mounting connector, ensuring that the holes in the base of the monitor line up with those on the connector ①, and then move the monitor downwards ② until the monitor is securely fixed to the connector ③.

Remember to remove the protective covering from the front of the monitor once installation is complete.

INSTALLING THE MONITOR IN AN EMBEDDING BOX

Avoid dusty or smoky environments or locations near sources of heat.

Positioning the embedding box:

Make a hole in the wall to position the top of the universal embedding box at a height of 1.60 m from the ground. The minimum distance between the sides of the embedding box and the closest object must be 5 cm.

Positioning the embedding box and fitting the wall mounting connector:

Pass the cable through the hole made in the embedding box. Embed the box and ensure that it is level and flush. Fix the wall mounting connector of the monitor to the embedding box with the screws supplied.

Positioning the monitor:

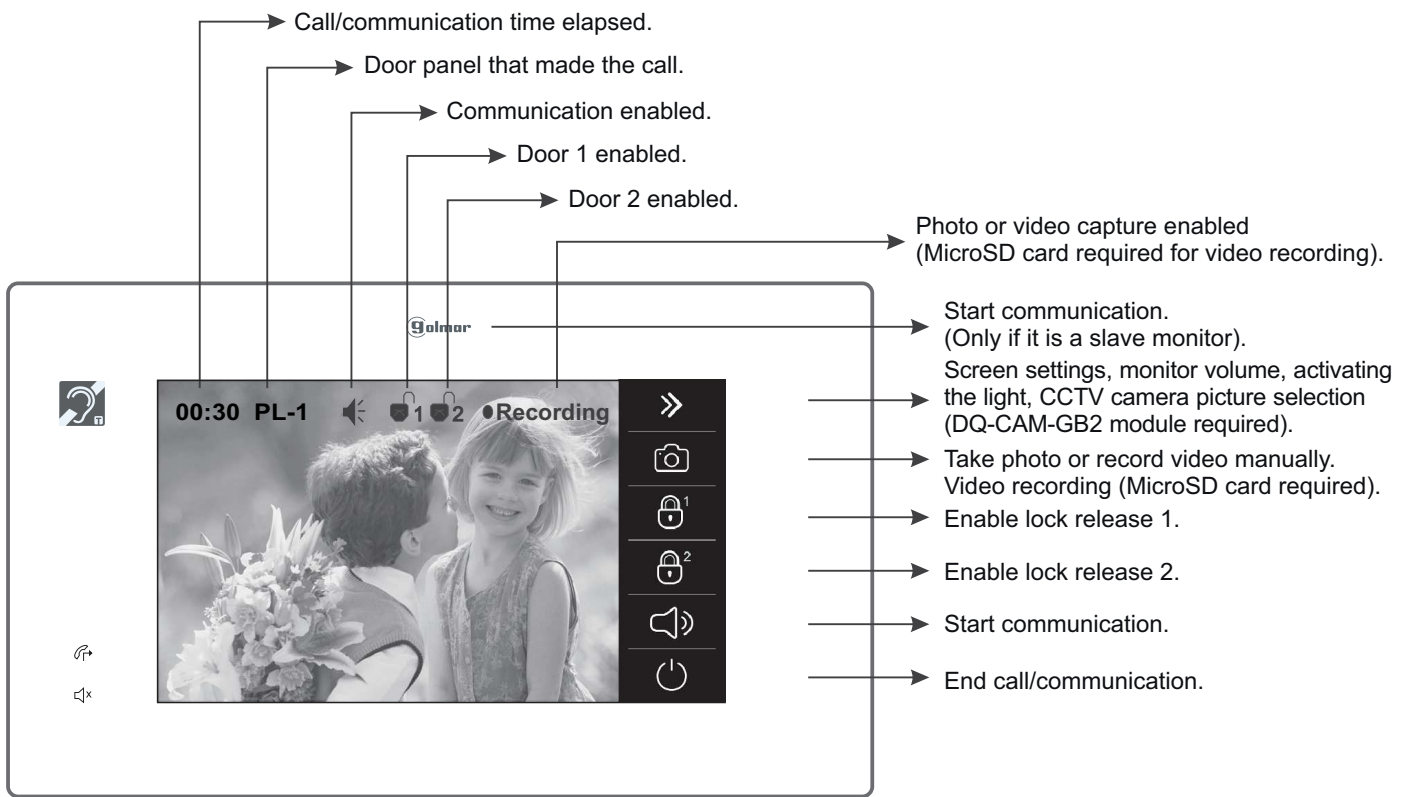

Connect the cables to the monitor (see p. 4), position the monitor in front of the wall mounting connector, ensuring that the holes in the base of the monitor line up with those on the connector ①, and then move the monitor downwards ② until the monitor is securely fixed to the connector ③.

Remember to remove the protective covering from the front of the monitor once installation is complete.

OPERATION

Monitor description when receiving a call and during communication:

Communication with hearing aid (Pentha GB2/H monitor only):

Make sure that the hearing aid is 15-25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

1.1 Receiving a call from the door panel:

When a call is received, the monitor(s) will play a melody, the status light of the monitor(s) will blink and show the image of the door panel on the main monitor without alerting the visitor. If the call is not answered within 40 seconds the monitor returns to standby mode.

The monitor automatically takes a photo or records a video (MicroSD card required for video).

- Screen settings, monitor volume, activating the light, CCTV camera picture selection (DQ-CAM-GB2 module required).
- Take photo or record video manually. Video recording (MicroSD card required).
- Enable lock release 1.
- Enable lock release 2.
- Start communication.
- End call/communication.

To open door 1, press the door release option on the screen during the call process: one press will activate the lock release for 5 seconds.

To open door 2, press the door release option on the screen during the call process: one press will activate the lock release for 5 seconds.

Continued overleaf

OPERATION

Continued from previous page.

1.2 Call not answered (missed call):

When a call is received, the monitor(s) will play a melody, the status light of the monitor(s) will blink and show the image of the door panel on the main monitor without alerting the visitor. If the call is not answered within 40 seconds the monitor returns to standby mode.

The monitor automatically takes a photo or records a video (MicroSD card required for video).

1.3 Ending a call from the door panel:

When a call is received, the monitor(s) will play a melody, the status light of the monitor(s) will blink and show the image of the door panel on the main monitor without alerting the visitor. To end the call, press option on the screen of the monitor.

To open door 1 or 2, press option / on the screen of the monitor during the call process: one press will activate the door release 1 or 2 for 5 seconds.

- To open door 1, press the door release option during the call or communication process: one press will activate the door release for 5 seconds.
- To open door 2, press the door release option during the call or communication process: one press will activate the door release for 5 seconds.
- End call.

1.4 Answering a call from the door panel:

When a call is received, the monitor(s) will play a melody, the status light of the monitor(s) will blink and show the image of the door panel on the main monitor without alerting the visitor. The monitor automatically takes a photo or records a video (MicroSD card required for video). To answer a call, press option on the master monitor screen or the logo on the front of any slave monitor in the apartment (unless the 'display image in call' function is activated on the slave monitor, in which case, option must be pressed). If the monitor is a PENTHA GB2/H with icon on the front, make sure that the hearing aid is 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

Communication will last for 90 seconds or until option on the screen is pressed.

To open door 1 or 2, press option / on screen during the communication or call processes: one press will enable the lock release for 5 seconds.

- Start communication.
- To open door 1, press the door release option on the screen during the call process: one press will activate the lock release for 5 seconds.
- To open door 2, press the door release option on the screen during the call process: one press will activate the lock release for 5 seconds.
- End communication.

OPERATION

Continued from previous page.

1.5 Answering a call from the door panel (activating the light and displaying pictures from DQ-CAM-GB2 cameras):

When a call is received, the monitor(s) will play a melody, the status light of the monitor(s) will blink and show the image of the door panel on the main monitor without alerting the visitor. The monitor automatically takes a photo or records a video (MicroSD card required for video). To answer a call, press option  on the master monitor screen or the  logo on the front of any slave monitor in the apartment (unless the 'display image in call' function is activated on the slave monitor, in which case, option  must be pressed). If the monitor is a PENTHA GB2/H with icon  on the front, make sure that the hearing aid is 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

Communication will last for 90 seconds or until option  on the screen is pressed.

To open door 1 or 2, press option  /  on screen during the communication or call processes: one press will enable the lock release for 5 seconds.

-  Start communication.
-  To open door 1, press the door release option during the call or communication process: one press will activate the door release for 5 seconds.
-  To open door 2, press the door release option during the call or communication process: one press will activate the door release for 5 seconds.
-  End communication.

During the communication process, the following functions can be performed:

→ Communication time elapsed (communication time of 90 seconds).

→ Door panel that made the call.

→ Communication enabled.

1st selection screen

→ Go to 2nd selection screen.

→ Take photo or record video manually from the door panel. Video recording (MicroSD card required).

→ Enable lock release 1 (relay 1 of the door panel).

→ Enable lock release 2 (relay 2 of the door panel).

→ End communication.

2nd selection screen

→ Go to 1st selection screen.

→ Activate external light (SAR-GB2 module required).

→ Adjust brightness, contrast, colour and communication volume (see pp. 12-13).

→ Adjust screen format (see pp. 12-13)

→ Select CCTV camera pictures, see p. 11. (DQ-CAM-GB2 module required)

→ Display image from door panel that made the call. (See p. 11).

OPERATION

Continued from previous page.

To display the picture from one of the installed cameras, press option **»»**. The following selection screen will be displayed. (DQ-CAM-GB2 camera module required).

Then press option **☎**; the following camera selection screen will be displayed. Press the option corresponding to the 'CM' camera whose picture needs to be displayed.

Then, by displaying the picture from camera 1 'CM - 1' selected and maintaining audio communication (with the door panel that made the call), the following functions can be performed:

<p>1st selection screen</p>	<ul style="list-style-type: none"> → Communication time elapsed (communication time of 90 seconds). → Picture from the camera selected. → Communication enabled (with the door panel that made the call).
<p>2nd selection screen</p>	<ul style="list-style-type: none"> → Go to 2nd selection screen. → Take photo or record video manually from the camera selected. Video recording (MicroSD card required). → Enable lock release 1 (relay 1 of the door panel in communication). → Enable lock release 2 (relay 2 of the door panel in communication). → End communication.
	<ul style="list-style-type: none"> → Go to 1st selection screen. → Activate external light (SAR-GB2 module required). → Adjust brightness, contrast, colour and communication volume (see pp. 12-13). → Adjust screen format (see pp. 12-13) → Select CCTV camera pictures. (DQ-CAM-GB2 module required) → Display image from door panel that made the call.

SCREEN AND VOLUME SETTINGS MENU

To access the screen and volume settings menu in the monitor, it must be in communication or auto switch-on mode. Then press option  and the 1st selection screen will be displayed.

To access scene settings, press option . The following selection screen will be displayed; select the type of picture required (normal, bright, soft or user) by pressing the respective option. Press the door panel image shown on the screen to exit and return to the 1st selection screen.

1st selection screen

To access the brightness, contrast and colour settings, press option . The following selection screen will be displayed; press option  or  in each selection field to increase or decrease contrast , brightness  and colour . Press the door panel image shown on the screen to exit and return to the 1st selection screen.

1st selection screen

To access the monitor's volume setting, press option . The following selection screen will be displayed; press option  or  in selection  to increase or decrease the volume. Press the door panel image shown on the screen to exit and return to the 1st selection screen.

Monitor in standby

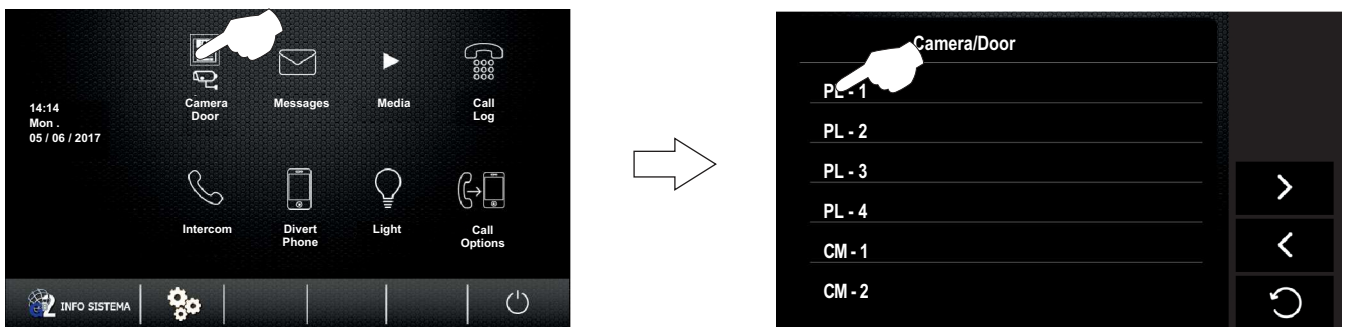

USER MENU

To access the menu, the monitor must be in standby. Then click on the screen or the **Golmar** logo on the front of the monitor. The main menu options screen will then appear.

1.1 Displaying the main door panel image:

To display the main door panel image, press 'Camera / Door'. The following selection screen will be displayed. Press option 'PL - 1'.

The following screen will display the image from the door panel with address 1, indicating the door panel selected 'PL-1' and the connection time elapsed. The connection will last for 30 seconds or until option is pressed.

- Screen settings, monitor volume, activating the light, CCTV camera picture selection (DQ-CAM-GB2 module required). (See settings pp. 12-13).
- Take photo or record video manually. Video recording (MicroSD card required).
- Enable lock release 1.
- Enable lock release 2.
- Start communication.
- End auto switch-on (return to the selection screen).

To open door 1, press the door release option on the screen during the picture display process: one press will activate the lock release for 5 seconds.

To open door 2, press the door release option on the screen during the picture display process: one press will activate the lock release for 5 seconds.

USER MENU

Continued from previous page.

To establish audio and video communication with the door panel selected, press option . The screen will display symbol . If the monitor is a PENTHA GB2/H with icon on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel. Connection will last for 30 seconds or until option is pressed.

This symbol is only displayed in communication enabled mode.

- Screen settings, monitor volume, activating the light, CCTV camera picture selection (DQ-CAM-GB2 module required). (See settings pp. 12-13).
- Take photo or record video manually. Video recording (MicroSD card required).
- Enable lock release 1.
- Enable lock release 2.
- Start communication.
- End auto switch-on (return to the selection screen).

To open door 1, press the door release option on the screen during the communication process: one press will activate the lock release for 5 seconds.

To open door 2, press the door release option on the screen during the communication process: one press will activate the lock release for 5 seconds.

1.2 Displaying images from the door panels:

To display the image from one of the installed door panels, press 'Camera/Door'. The following selection screen will be displayed. Press the option corresponding to the 'PL' door panel whose image needs to be displayed.

The following screen will display the image from the door panel with address 2, indicating the door panel selected 'PL-2' and the connection time elapsed. The connection will last for 30 seconds or until option is pressed.

- Screen settings, monitor volume, activating the light, CCTV camera picture selection (DQ-CAM-GB2 module required). (See settings pp. 12-13).
- Take photo or record video manually. Video recording (MicroSD card required).
- Enable lock release 1.
- Enable lock release 2.
- Start communication.
- End auto switch-on (return to the selection screen).

To open door 1, press the door release option on the screen during the picture display process: one press will activate the lock release for 5 seconds.

To open door 2, press the door release option on the screen during the picture display process: one press will activate the lock release for 5 seconds.
