H.265 5MP NVR SERIES

User Manual

Please read instructions thoroughly before operation and retain it for future reference. Online manual download: <u>www.surveillance-download.com/user/h517.swf</u>

IMPORTANT SAFEGUARD

RoHS conform

All lead-free products offered by the company comply with the requirements of the European law on the Restriction of Hazardous Substances (RoHS) directive, which means our manufacture processes and products are strictly "lead-free" and without the hazardous substances cited in the directive.

The crossed-out wheeled bin mark symbolizes that within the European Union the product must be collected separately at the product end-of-life. This applies to your product and any peripherals marked with this symbol. Do not dispose of these products as unsorted municipal waste. Contact your local dealer for procedures for recycling this equipment.

Œ

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Federal Communications Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device mat not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

1. HARDWARE OVERVIEW

1.1 Front Panel

Note: The functions on the front panel and rear panel may vary, depending on the mode you have.

1) Select & Unlock

These two buttons are used to unmount a hard disk. Press **Select** and check the HDD indicator (red & always on) to ensure the hard disk you want to unmount is chosen. Then, choose **Unlock** to unmount the hard disk (HDD indicator: red & flashing).

When the hard disk unmount is completed, the indicator will be off, and you're ready to remove the hard disk from the HDD tray.

2) HDD Indicators

Check the HDD indicator for each installed hard disk to ensure the hard disks work normally.

Note: Some statuses are for selected models only.

Color	Status	Meaning
	No light	No hard disk is installed, or the installed hard disk is not detected. Please install a hard disk or replace the installed hard disk, and try again.
Green	Always on	The installed hard disk is detected well.
Green	Flashing	Data reading / writing.
Red	Always on	The hard disk is selected for unmounting.
Red	Flashing	The device is mounting or unmounting the selected hard disk.

3) Status LED indicators

Press to power on the device; press and hold for 3 seconds to power off the device.

Note: Some indicators are for selected models only.

ባ	This device is power-supplied.
4	The device is connected to Internet.
Ç	The device is connected to LAN.
I.	An alarm event occurs.
err.	Any of the adapter, power or fan is abnormal.
	Video playback is on.
eSATA	An external disk array is connected.
	An USB flash drive or USB hard disk is connected.
©	This device is in the standby mode when it's powered off.

4) <u>Power</u>((())

Press to power on the device; press and hold for 3 seconds to power off the device.

5) <u>Mouse port</u> (⊕^{_})

Insert a mouse for function operation.

6) <u>USB port</u> (⊷⇔)

Insert a compatible USB flash drive for video backup.

Note: For the compatible list of USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 61.

1.2 Rear Panel

1) <u>HDMI1</u>

This port is used to connect the monitor which supports HDMI interface for main monitor output

2) <u>HDMI2</u>

This port is used to connect a secondary monitor which supports HDMI interface for secondary monitor output. For details, please refer to "6.10 DISPLAY" at page 46.

3) <u>VGA</u>

Connect to the VGA port of the monitor which supports VGA video output for main display output.

- <u>VIDEO OUT (For selected models only)</u>
 Connect to a CRT monitor for main monitor output.
- 5) <u>eSATA (For selected models only)</u> This port is used to connect a storage device supporting eSATA interface; for instance, an external disk array.

Note: Please purchase a disk array supporting Linux system to ensure your device works properly. For the compatible list, please refer to "APPENDIX 6 DISK ARRAY COMPATIBLE LIST" at page 64.

Note: If the disk array is not connected or detected well, check the mode of your disk array, or do a reset default on your disk array and try again.

6) <u>WAN</u>

This port is used to connect your device to Internet.

7) <u>LAN</u>

This port is used to connect IP cameras to this device with a hub (if necessary) locally.

8) <u>MIC IN</u>

Connect to a microphone for audio transmission.

9) AUDIO OUT

Connect to a speaker for audio transmission.

10) External I/O Ports

These ports are used to connect external I/O devices, such as magnetic contacts or buzzers, or external control devices, such as other brand's speed dome camera or keyboard controller.

11) USB 3.0

Insert a compatible USB flash drive or USB hard disk for video backup.

Note: For the compatible list of USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST" at page 61.

12) <u>DC IN</u>

Connect to the supplied adapter.

13) <u>••</u> Power Switch (For selected models only)

Switch to "—" to turn on the power, and "O" to turn off the power.

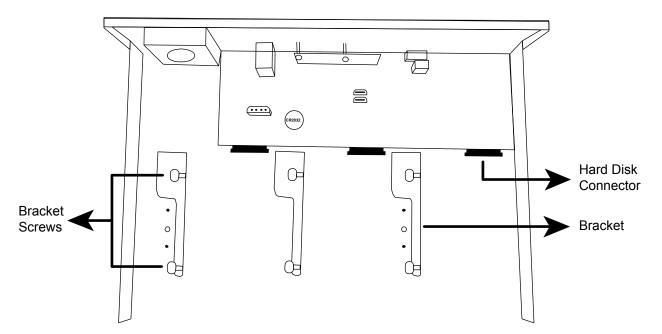

2. CONNECTION

2.1 Hard Disk Installation

Note: It's necessary to install a hard disk first before firmware upgrade to ensure the upgrade process works properly.

Type 1

Step1: Remove the top cover, and find the hard disk connector and bracket in the device.

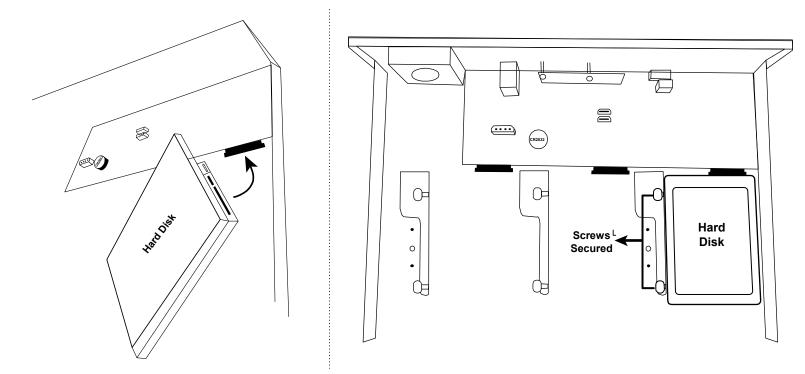

Step2: Get a compatible hard disk. With the PCB side facing down, insert the hard disk to one of the hard disk connector.

Note: To use a green hard disk, use **ONLY** the hard disk designed especially for surveillance to ensure the device works properly.

Step3: Fasten the hard disk to the bracket by securing the screws on the bracket.

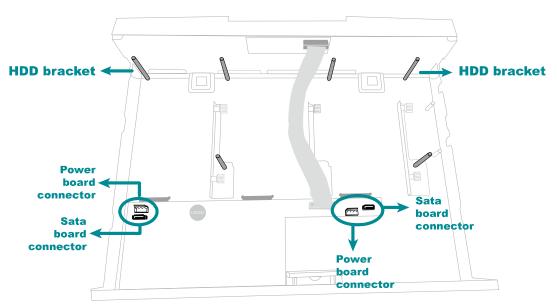

Note: For the 16CH model which supports five hard disks, please go to "Additional Brackets for Two More Hard Disks" to know how to install the other two hard disks.

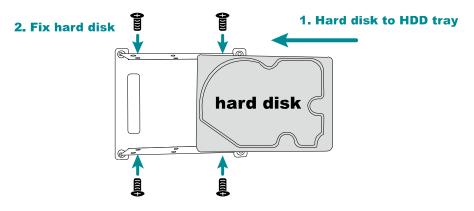

Step4: Replace the top cover and fasten the screws you loosened in Step1.

Additional Brackets for Two More Hard Disks

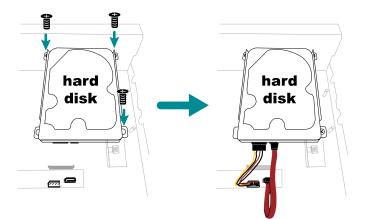

- Step1: For the 16CH model which supports five hard disks, find two pairs of HDD trays, SATA cables and power cables in the sales package.
- Step2: Find HDD brackets, power board connectors (white) and Sata board connectors (black) on the main board. To install a hard disk, three brackets, one power board connector (while) and one Sata board connector (black) are needed.

Step3: Place the hard disk to the HDD tray and fix it on the tray with the supplied screws.

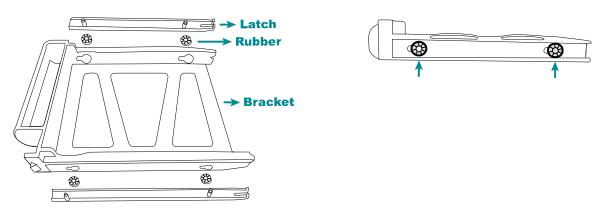

- Step4: Fix the HDD tray to the HDD brackets with the supplied screws.
- Step5: Connect the Sata cable and power cable to main board and the hard disk.

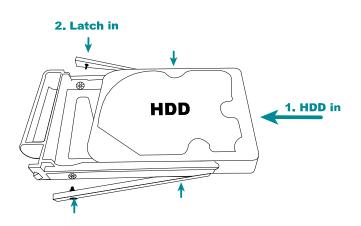

Type 2

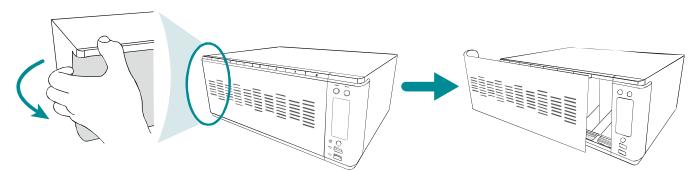

Step1: Find the HDD tray and its accessories in the sales package, and place the rubber to the HDD tray as shown below.

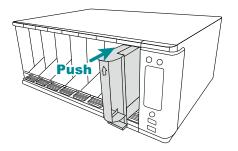

Step2: Get a compatible hard disk. With the PCB side facing down and the hard disk's connector facing the outside. Then, place the hard disk in the HDD tray and insert the latches.

Step3: Remove the front cover by pulling from the left end of the cover as indicated below. You'll see eight HDD bays.

Step4: Push the HDD tray with a hard disk installed to the end of the HDD bay to ensure the hard disk is inserted properly.

- Step5: Replace the front cover removed in Step3 back to the NVR.
- Step6: Power on the NVR and wait till the initialization is completed. Check if the HDD indicator on the front panel is flashing in red.

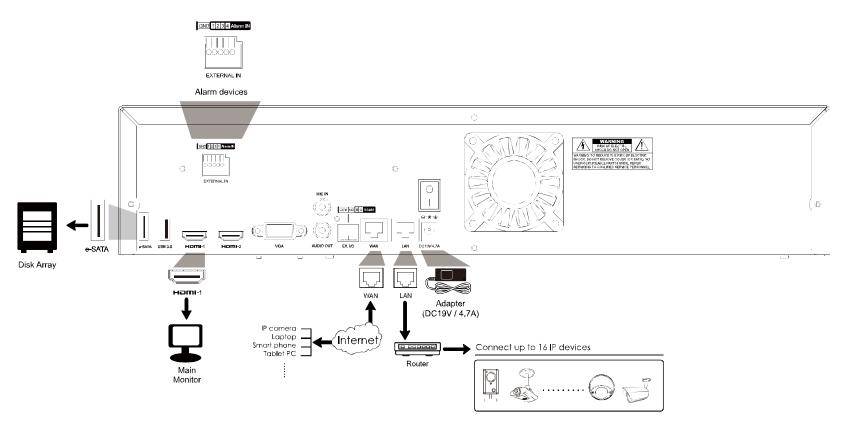

Note: Please check "HDD Indicators" in "1.1 Front Panel" for details.

Then, right click the mouse to exit from the full screen mode. Click **MENU** \rightarrow **STORAGE** to see if all hard disks you inserted are detected, and click \square one by one to mount them. Wait till the hard disk is mounted and the status shows **READY**. When you're prompted to clear the hard disk, choose **YES**. For details, please check "6.6 STORAGE" at page 40.

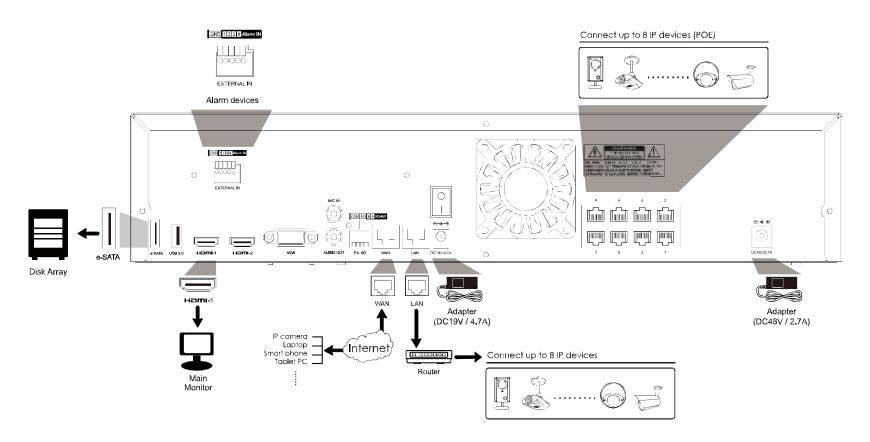

2.2 Connection

Connect a monitor, IP cameras, adapters, a mouse, and other devices necessary to this recorder as illustrated below.

Type 1

Type 2

Then, power on the whole system and wait till the system initialization is done.

2.3 Camera IP Configurations by LAN

The auto mode is used to simplify the complicated network settings within three minutes. The connection mode of the LAN port is **AUTO** by default. This mode is suitable when the LAN port of the device is connected to a hub / switch.

Note: SETTING Path: **MENU** → **NETWORK** → **LAN** → **MODE**.

Note: For access this recorder remotely with your mobile device or laptop, you need to connect this recorder to Internet. For details, please get the setup manual from the supplied CD or from www.surveillance-download.com/user/network_setup/network_setup_recorder.pdf.

The device will automatically configure the IP address of a camera connected by LAN if:

- The connected IP camera is our brand's IP camera.
- The IP configuration method of the camera is **DHCP**.
- The camera is powered on before the device is powered on.

If the device **doesn't** configure the IP address of your camera automatically as described above, your IP camera might **NOT** be:

- Our brand's IP camera.
- Set to **DHCP** as its default IP configuration method.

To solve this, reconfigure the IP address of the camera to 10.1.1.xx (*xx* ranges from $11 \sim 253$), which is in the same network segment as the device.

- For other brand's IP camera, please check its user manual to know how to change the IP address manually.
- For our brand's IP camera, please check the instructions below:
 - a) Go to MENU → CAMERA → CONNECTION, and select IP SEARCH at the bottom right corner. You'll see the list of every connected IP camera with its connection status to this device and MAC address.

	IP SEARCH								
ASSIGN	EDIT	DEVICE TYPE	IP	NETMASK	GATEWAY	PRIMARY DNS	PORT	MAC	VENDOR
		IPCAM	10.2.1.33	255.255.255.0	10.2.1.10	8.8.8.8	88	00:0E:53:31:06:E5	AVTECH
						REFR	ESH	ADD)

The device will *automatically* configure the IP address of a camera connected by LAN if:

- The connected IP camera is our brand's IP camera.
- Reset the IP camera to default value (the default IP configuration method of the camera is "DHCP").
- The camera is powered on before the device is powered on.

If the device **doesn't** configure the IP address of your camera automatically as described above, your IP camera might **NOT** be:

- Our brand's IP camera.
- Set to "DHCP" as its default IP configuration method.

SETUP						
DHCP

							REFR	REFRESH ADD)

d) The device will then detect the IP camera and display images soon.

Note: To configure this recorder to access other IP camera connected remotely for live viewing or video backup, you need to connect this recorder to Internet first.

3. FOR INITIAL USE

For the first time to power on this device, you might be prompted to:

- Go through the setup wizard
- Clear hard disk
- Change default user name and password

3.1 Setup Wizard

The setup wizard is prompted to guide you finishing the most common settings you might need to do.

Note: It's okay to skip the wizard. You can configure the following settings later in their respective menus.

Select **NEXT** to go to the next step.

	SETUP WIZARD			
	PLEASE INPUT THIS MACHINE NAME			
SKIP		PREV	NEXT	

Name the device. If you don't want to name the device, just skip to the next step.

Note: To name the device later, please go to **MAINTAIN** → **SYSTEM**.

SETUP WIZARD							
USER NAME	С	office_hd					
PASSWORD office145							
CONFIRM PASSWORD	С	office145					
PLEASE INPUT THE ADMINISTRATOR'S USER NAME AND PASSWORD.							
SKIP	PREV	NEXT					

Change the default user name and password. If you don't change the user name and password here, you're not able to go to the next step. This step is compulsory.

Note: To change or edit user name and passwords, please go to **SYSTEM** \rightarrow **ACCOUNT** \rightarrow **USER LIST**.

	SETUP WIZARD

3.2 Mount Hard Disk

When this device is powered on, you'll see the hard disk indicators are flashing in red, indicating the hard disk are not detected by this recorder.

Right click the mouse to exit from the full screen mode. Click **MENU** \rightarrow **STORAGE** to see the status of each connected hard disks. Click $\mathbf{\overline{\Sigma}}$ one by one to mount them. When you're prompted to clear the hard disk, choose **YES**.

When the hard disk is mounted, the status will be changed from **MOUNTING** to **READY**.

					S	FORAGE

3.3 Change User Name and Password

It's highly recommended to change the user name and password of this device to keep your account safe. Otherwise, any person could access this device if he knows the default user name and password.

If you didn't go through the setting wizard at the first place, you'll be prompted to change the user name and password:

	WARNING					
PLEASE BE ADVISED TO MODIFY THE DEFAULT ACCOUNT TO ENSURE YOUR INFORMATION SECUIRTY.						
 MODIFY 						
O REMIND ME L	ATER					
O DON'T REMIND ME ANYMORE						
	CONFIRM					

Choose **MODIFY** to start the change immediately.

To change later, go to **MENU** \rightarrow **ACCOUNT** \rightarrow **USER LIST**, and choose to change the default user name and password of **SUPERVISOR**.

4. USER INTERFACE

4.1 Local Access

Connect your USB mouse to one of the USB ports on the front panel, and move your mouse to enter the password with the password keypad. The default user name and password are both **admin**.

When you log into the system, the display is in the full screen mode. Right click the mouse to show the tool bar and function panel.

Note: You may also customize a user level to have different access privileges in ACCOUNT → GROUP. For details, please refer to "6.7.2 GROUP" at page 42.

4.3.4 Playback Panel

Click to go to the playback panel.

Step1: In **CHANNEL**, choose the channel(s) you want to search.

Step2: In **DATE**, the date(s) which includes video footage of the selected channel(s) will be marked in blue. Choose the date you want.

Step3: (Optional) In **EVENT**, choose the event type(s) to narrow down the search if needed.

Step4: Slide the timeline to search the time segment within which includes video footage. The time segment within which includes video footage is marked in yellow-green.

Step5: Move to the time segment you want and video playback starts automatically.

•	Fast Forward	Increase the speed for fast forward.
₩	Fast Rewind	Increase the speed for fast rewind.
► / II	Play / Pause	Click to play the latest recorded video clip immediately, and click again to pause. In the pause mode, click ➡ once to get one frame forward, and click ◀ to get one frame rewind.
	Stop	Click to stop the video playback.
>>	Slow Playback	Click once to get 1/4X speed playback, and click twice to get 1/8X speed playback.
∢ / ▶	Previous / Next Hour	Click to jump to the next / previous time interval in an hour, for example, 11:00 ~ 12:00 or 14:00 ~ 15:00, and start playing the earliest event video clip recorded during this whole hour.
Ē	Event List	Click to enter the quick search menu for specific record data search, or select FULL to show all event logs.
АСВ	Repeat	Click to set point A and point B in a video clip, and the system will play only the specified range in that clip.
Ŧ	Backup	Click to open the backup menu for video backup.

Playback Control

5. FREQUENTLY-USED FUNCTIONS

5.1 IP Device Search

Note: This function is applicable only for our brand's IP camera. For other brand's IP camera, please check its user manual to know how to change the IP address manually under the network segment of 10.1.1.xx (*xx* ranges from $11 \sim 253$).

Go to **MENU** \rightarrow **CAMERA** \rightarrow **CONNECTION**, and select **IP SEARCH** at the bottom right corner. You'll see the list of every connected IP camera with its connection status to this device and MAC address.

	IP SEARCH									
ASSIGN	EDIT	DEVICE TYPE	IP	NETMASK	GATEWAY	PRIMARY DNS	PORT	MAC	VENDOR	
		IPCAM	10.2.1.33	255.255.255.0	10.2.1.10	8.8.8.8	88	00:0E:53:31:06:E5	AVTECH	
						REFR	ESH	ADE)	

Make sure the IP address of the connected camera is under the network segment of 10.1.1.*xx* (*xx* ranges from 11 ~ 253). If not, select 2 and change the network type from **STATIC** to **DHCP**. Then, Click **APPLY** to save your changes.

	SETUP

5.3 System Logout

When different user accounts are created for system management, make sure you log out after your access in case other people access the system with your account.

Choose MENU \rightarrow POWER CONTROL, and choose $\ref{eq:control}$ to log out the system.

Note: The default user name and password are both **admin**, which is the highest user level.

5.4 PTZ Control

4	Enter Click to confirm your selection / enter the menu.							
▲ / ▼ / ◄ / ►	Up / Down / Left / Right	Click the arrow keys (\blacktriangle / \blacktriangledown / \blacklozenge / \blacklozenge) to more the camera lens up / down / left /right.						
←	rol							
	Iris + / Iris -	This two buttons are designed for the PTZ camera which uses Pelco-D to control. To know the actions after clicking Iris + and Iris -, please refer to the camera's user manual.						
E / E	Focus near / far	Click to adjust the focus of the image.						

← 🕂 Camera Co	ntrol						
	Zoom in / out	 Click to zoom in / out on the image. Users could also zoom in / out on the image by simply drawing a square on the screen, and the zoom ratio depends on how large the square is. Zoom in: Draw the square from top left to bottom right. Zoom out: Draw the square from bottom right to left top. 					
+ /	Zoom in / out max	Click to zoom in on the image to the largest / zoom out on the image to its original size.					
	Auto mode	Click to activate the auto function. Before using it, you need to assign a specific function that will be enabled when is clicked. For details, please refer to the user manual of the camera.					
Ð	Auto tracking	Click to start auto tracking when your speed dome camera supports this function.					
Ξ.	Hot point	Click on the screen to move and center the camera view to the point you just clicked.					
*	Config.	Click to configure the speed to pan / tilt the speed dome camera.					
	Joystick	Click to control the movement of a speed dome camera or a motorized-pan camera. Drag and hold the mouse on the screen to move the camera. You'll see \bullet and \clubsuit on the screen. The farther these two icons, the faster the movement.					
Preset Point	t						
		These ten buttons are used for preset point $1 \sim 10$.					
01 ~ 10	Preset point 01 ~ 10	To set or go to other preset point (such as 15), please enter the numbering manually in the input box next to \rightarrow , and choose \checkmark to set the preset point, or \rightarrow to go to the preset point.					
✓	Set preset point	Move the camera view to the point you want to set, and click the numbering you want from $01 \sim 10$, or enter the numbering manually in the input box next to $\rightarrow \bullet$. Then, click \checkmark to confirm.					
→ •	Go to preset point	To go to the preset point from 1 ~ 10, simply click the button. To go to the other preset point out of 10, enter the numbering manually in the input box next to +•, and choose +• to confirm.					

5.5 Video Backup

Note: Before using the USB flash drive, please use your PC to format the USB flash drive to FAT32 format first. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST at page 61.

Note: For video backup, please use USB flash drive or back your data up over the Internet. It's **NOT** allowed to connect the hard disk to your PC and get the video data directly.

To copy recorded data for video backup, click to go to the playback panel, and choose \clubsuit at the bottom tool bar to open the backup menu:

SOURCE DESTINATION	
DATA TYPE VIDEO LOG TARGET US	B DEVICE
RANGE 2017/07/18 23:03:52 ~ 2017/07/18 23:03:52 AVAILABLE SIZE	3 GB

CANCEL	BACKUP

- Step1: In **SOURCE**, choose the data type (VIDEO or LOG) and the time range you want to copy from the calendar. The date with video recording will be shown in blue.
- Step2: In **CHANNEL**, choose the channel(s) you want.
- Step3: The video footage can only be saved to a USB device. Specify where to save in the USB device in **STORAGE**.
- Step4: Choose **BACKUP** to start. The backup video will be in the AVI format.

6. MAIN MENU

6.1 CAMERA

6.1.1 CONNECTION

To know how to add our brand's IP cameras automatically, please refer to "2.3 Camera IP Configurations by LAN" at 7.

To manually add a camera connected locally or remotely, click \square to enter the setup page.

Note: Before connecting other brand's IP camera, make sure its IP address is set to 10.1.1.xx (xx ranges from $11 \sim 253$). To know how to change the IP address of the camera, please refer to its user manual.

													APPLY			

1) CHANNEL TITLE

Click to revise the channel title (up to 63 characters). The default title is the channel number.

2) INTERFACE

Here shows how the camera is connected to this device: IPCAM.

3) <u>ENABLE</u>

Here shows the functions you can enable or disable:

lcon	Meaning	Description
1 / 🕝	Time stamp on / off	Display the recording time or not.
	Edge recording on / off	Enable this function to allow video recording directly to the microSD card inserted in the IP camera when the NVR is disconnected to the camera and unable to work properly.
₽ , Ø	Recording transfer on / off	When edge recording is on, enable this function to allow the video saved in the microSD card of the camera transferring to the NVR when the NVR is reconnected to the camera and work properly.
! / !	Audio recording on / off	Enable or disable audio recording for the selected channel if the connected camera supports audio recording.

4) CACHE TIME (MSEC)

Drag the slide bar to change the cache time which determines the buffering time of playback.

Note: To speed up the camera's operation, especially for the PTZ camera, you may set the CACHE TIME (MSEC) as zero, but this change may debase the transmission quality.

5) PORT FORWARD

- This function is used when you only want to see a single channel of this recorder remotely.
- a) Set the port number for the channel in PORT FORWARD. The default value for CH1 is 81, and the default value for CH2 is 82... etc. If you want to change the port number to other value, the range is from 1 ~ 65535.
- b) Switch \otimes to \oslash to enable port forwarding.

The address of the channel will be "http://recorder_address:port_number". Enter the address in Internet Explorer, and see if you can access the device connected channel individually.

Note: The user name and password are still required to access the device connected to the channel. Make sure you know the user name and password to access the device. For details, please refer to its user manual.

6) <u>CAMERA TYPE</u>

Here shows the camera type which is detected automatically.

7) ALARM OUT (Depending on the camera you connected)

This function is used to set how long the device should work in seconds when the 🏵 is clicked on the camera channel.

Note: An alarm-out device (such as a buzzer) should be connected to the IP camera first for this function to take effects.

5.1.3 IMAGE

Click domination / here brightness / contrast / saturation / here by channel.

IMAGE

	•							L	
									APPLY

1) <u>ALARM</u>

Select N.C. / N.O. depending on your installation need. The default alarm value is OFF.

<u>INTERNAL ALARM</u>
 Select if you want to activate the PIR detection function for the selected channel (**ON** / **OFF**).

Note: This option is available only when the camera you connected has a PIR sensor built-in.

3) <u>SENSITIVITY</u>

Select the detection sensitivity of the selected channel. **2** is the highest sensitivity.

4) <u>MOTION</u>

Select if you want to activate the motion detection function for the selected channel (ON / OFF).

5) <u>AREA</u>

Click **EDIT** to set the motion detection area.

There are 16×12 grids per camera for all channels. Pink blocks represent the area that is not being detected while the transparent blocks are the area under detection.

Note: To exit area setting and return to the detection page, right click your mouse.

6) ADVANCED CONFIG

The advanced settings are available only when the connected camera supports.

Privacy mask

You can cover certain areas on the camera image with privacy masks. Up to 20 areas could be added.

PRIVACY MASK						
MOSAIC SI	ZE					8x8
NAME	FUNCTION	MOSAIC	COLOR	MOSAIC COLOR	R TRAN	SPARENCY

Camera Guard

This function is used to lock the camera to a fixed point and no pan action could be made until the lock mode is disabled. Before using this function, make sure:

- 1. You've configured at least one preset point and one preset group for the connected camera. To know how to configure preset points and preset group, please refer to "" at page .
- 2. You have an iOS or android mobile device with our free app, EagleEyes, installed.
- 3. Your recorder is connected to Internet, and registered in the address book of EagleEyes.

	CAMERA GUARD – CH1		
GUARD LOCK		10	1
TIMEOUT (SECS)		30	\sim
PRESET GROUP		1	\sim
PRESET NUMBER		1	\sim
		ΔPP	ΙY

Item	Description
GUARD LOCK	Enable (ON) or disable (OFF) this function.
TIMEOUT (SECS)	Configure the timeout in seconds (30 / 60 / 90 / 120) after which the camera will be fixed to the current point and any attempt to pan the camera to another point will be failed.
PRESET GROUP	Choose the group where the point you'd like to use is configured, and go to PRESET NUMBER to choose the preset point number.
PRESET NUMBER	Choose the preset point number you'd like to use when GUARD LOCK is enabled.

6.2 RECORD

Set the image size, video quality and other related parameters individually for live display, record streaming and sub streaming.

Note: The settings shown below depend on the setting tab you selected in this setting page.

- a) **D.O.R** (Depend on record): When this option is checked, the video size, quality and other related parameters will follow the configurations in **RECORD STREAM**.
- b) **PROFILE**: Select the video profile pre-defined in your IP cameras. You can directly use the profile setting, or modify the setting on this page.
- c) **TYPE**: Select the compression format for each channel.

Note: The options selectable for **TYPE** depend on the camera you're intended to connect.

d) IMAGE SIZE: Select the image size for each channel.

Note: The options selectable for **IMAGE SIZE** depend on the camera you're intended to connect.

- e) **QUALITY**: Select the video quality for each channel. The higher the value, the better the image quality.
- f) **I.P.S.**: Image per Second, the higher the value, the more fluent the video.

Note: The options selectable for "I.P.S." depends on the camera you're intended to connect.

- g) **BITRATE (kbps)**: Select how much data to process per unit of time for each channel. The higher the value, the better the video quality.
- h) BITRATE CONTROL: Configure the upper bit rate limit for the selected channel if necessary.
 VBR When the bit rate of the camera exceeds the value you set, the video fluency may be affected;
 CBR When the bit rate of the camera exceeds the value you set, the image quality may be affected.
- i) **G.O.V.**: "Group of VOPs" is used to configure the length of G.O.V. The greater of the value, the less the bandwidth for transmission, and the poorer the image quality.

+					

6.3.1 Pre-defined Scenarios

There are 13 pre-defined scenarios for you to quickly enable the recording and notification functions which are used frequently.

Note: All pre-defined scenarios are not editable. If any changes should be made to suit your need, please add a scenario rule manually.

1) MOTION RECORD

All channels are selected in this rule. The recorder starts recording the channel which has a motion event. Scenario template used: **ONE OF (EVENT) TO (RECORD)**.

2) ALARM RECORD

All channels are selected in this rule. The recorder starts recording the channel which has an alarm event. Scenario template used: **ONE OF (EVENT) TO (RECORD)**.

Note: The alarms here refer to the alarm devices connected to the IP cameras or the NVR. For the alarm events triggered by the PIR sensor built into the camera, please choose PIR instead.

3) GUARD RECORD

When **Guard** is enabled from EagleEyes, our mobile app, the recorder starts recording all channels. Scenario template used: **ONE OF (EVENT) TO (RECORD)**.

4) PUSH VIDEO TRIGGERED BY BUILT-IN PIR SENSOR

When motion & PIR events occur simultaneously, you'll receive Push Video on your mobile device. Scenario template used: **ALL OF (EVENTS) TO DO (ACTION) AND THEN (ACTION)**.

Note: To know how to enable Push Video, please refer to "APPENDIX 2 PUSH VIDEO CONFIGURATION" at page 58.

- <u>PUSH VIDEO TRIGGERED BY EXTERNAL ALARM</u>
 When motion & alarm events occur simultaneously, you'll receive Push Video on your mobile device. Scenario template used: **ALL OF (EVENTS) TO DO (ACTION) AND THEN (ACTION)**.
- **Note:** The alarms here refer to the alarm devices connected to the IP cameras or the NVR. For the alarm events triggered by the PIR sensor built into the camera, please choose PIR instead.
- **Note:** To know how to enable Push Video, please refer to "APPENDIX 2 PUSH VIDEO CONFIGURATION" at page 58.
 - <u>MANUAL RECORD</u>
 All channels are selected in this rule. The recorder starts recording all channels at the specified time. Scenario template used: **START (RECORD) AT (TIME)**.
 - 7) <u>SEND PUSH STATUS FOR HEALTH CHECK</u> All system health events are selected in this rule. When one of the health events occurs at the specified time range, you'll receive Push Status on your mobile device. Scenario template used: **ONE OF (HEALTH EVENT) OCCURRED AT (TIME) TO SEND PUSH STATUS**.
 8) <u>POP-UP ON LIVE MONITOR (MOTION AND EXTERNAL ALARM EVENT)</u>
 - All channels are selected in this rule. When any motion or alarm event occurs, you'll see pop-up messages on the right pane (Event List) of the monitor. Scenario template used: **ONE OF (EVENT) TO DO (ACTION)**.

Scenario template used: ONE OF (EVENT) TO DO (ACTION).

Note: The alarms here refer to the alarm devices connected to the IP cameras or the NVR. For the alarm events triggered by the PIR sensor built into the camera, please choose PIR instead.

9) MOTION DETECTION ON WHEN GUARD ON

All channels are selected in this rule. When **Guard** is enabled from EagleEyes, our mobile app, the motion detection of all channels is also enabled automatically.

Scenario template used: ONE OF (EVENT) TO DO (ACTION).

Note: Motion detection and alarm / PIR detection are two essential elements to trigger Push Video.

10) INTERNAL ALARM (PIR) DETECTION ON WHEN GUARD ON

All channels are selected in this rule. When **Guard** is enabled from EagleEyes, our mobile app, the PIR detection of all channels is also enabled automatically.

Scenario template used: ONE OF (EVENT) TO DO (ACTION).

- **Note:** The alarms here refer to the alarm devices connected to the IP cameras or the NVR. For the alarm events triggered by the PIR sensor built into the camera, please choose PIR instead.
 - 11) MOTION DETECTION OFF WHEN GUARD OFF

All channels are selected in this rule. When **Guard** is disabled from EagleEyes, our mobile app, the motion detection of all channels is also disabled automatically.

Scenario template used: ONE OF (EVENT) TO DO (ACTION).

12) INTERNAL ALARM (PIR) DETECTION OFF WHEN GUARD OFF

All channels are selected in this rule. When **Guard** is disabled from EagleEyes, our mobile app, the motion detection of all channels is also disabled automatically. Scenario template used: **ONE OF (EVENT) TO DO (ACTION)**.

13) PLAYBACK ON EVENT MONITOR (MOTION & EXTERNAL ALARM EVENT)

All channels are selected in this rule. When any motion or alarm event occurs, you'll see video playback on the monitor you set for **HDMI2 DISPLAY**.

Scenario template used: ONE OF (EVENT) TO DO (ACTION).

Note: You'll also need to manually choose **EVENT MONITOR** and configure related settings in **DISPLAY** → **HDMI2 DISPLAY**. For details, please refer to "6.10 DISPLAY" at page 46.

6.3.2 Scenario Customization

Click \pm and choose a template where you can press the button of **EVENT**, **RECORD**, **TIME** or **ACTION** to customize all your events and further actions:

- 1. ONE OF (EVENT) TO (RECORD)
- 2. ONE OF (EVENT) AT (TIME) TO DO (ACTION) AND THEN (ACTION)
- 3. AT (TIME) TO DO (ACTION) AND THEN (ACTION)
- 4. ALL OF (EVENTS) TO DO (ACTION) AND THEN (ACTION)
- 5. (EVENTS) TO TRIGGER (RECORD)
- 6. START (RECORD) AT (TIME)
- 7. ONE OF (HEALTH EVENT) OCCURRED AT (TIME) TO SEND PUSH STATUS
- 8. ONE OF (EVENT) TO DO (ACTION) AND THEN (ACTION)
- 9. ONE OF (EVENT) TO DO (ACTION)

<u>EVENT</u>

Up to 5 events could be added to the event list when you click the **EVENT** button.

Option		Description					
MOTION and ALARM	MOTION	Choose at least one channel which has enabled motion detection.					
	ALARM	Choose at least one channel which has connected to our brand's camera and an alarm sensor is connected to the camera.

Ŧ	Click 🛨 to customize the time range within which you want to activate the scenario rule.

<u>ACTION</u>

Up to 5 actions could be added to the action list when you click the **ACTION** button to combine a series of actions you'd like to have.

Option		Description			
RECORDER	RECORD	Choose at least one channel to start recording, and the record profile to use when recording is on.			
	RESTORE RECORD PROFILE	Restore the record profile group when the specified action is off.			
	SET RECORD PROFILE	Choose the record profile group defined in MENU \rightarrow RECORD \rightarrow RECORD STREAM.			
	START RECORDING EVENT CHANNEL	Choose the record profile group defined in MENU → RECORD → RECORD STREAM which is used for event-channel recording.			
	STOP RECORDING EVENT CHANNEL				
	START RECORDING ALL CHANNELS	Choose the record profile group defined in MENU \rightarrow RECORD \rightarrow RECORD STREAM which is used for all-channel recording.			
	STOP RECORDING ALL CHANNELS				
NOTIFICATION	PUSH VIDEO TO SEE PLAYBACK	When Push Video is received on the mobile device, slide to see event playback.			
	PUSH VIDEO TO SEE LIVE	When Push Video is received on the mobile device, slide to see live images.			
	PUSH MESSAGE	Enter the message you want to see on your mobile device when an event occurs.			
	PUSH STATUS	Send Push Status to your mobile device.			
	POP UP EVENT ON LIVE MONITOR	Choose at least one channel to show event icons, notifications and playback preview on the right pane of the live display.			
	PLAYBACK VIDEO ON EVENT MONITOR	Choose at least one channel to show its event recording when an event occurs on the event monitor you configured in MENU \rightarrow DISPLAY .			
	VIDEO MAIL	You can choose to receive notifications by Email			
	EMAIL SNAPSHOT	in four ways:			
	EMAIL STATUS	1. Event videos			
	EMAIL TEXT	 2. Snapshots 3. Abnormal status 4. Text 			
		Make sure at least a recipient is selected in RECEIVER and configure the related settings in each setting page.			
	UPLOAD VIDEO TO FTP UPLOAD SNAPSHOT TO FTP	You can choose to upload event videos or snapshots to the FTP site pre-defined in MENU → NETWORK → FTP .			
		A NETWORK 7 FTP. Make sure at least an FTP site is selected in PROFILE , and configure the related settings in each setting page.			

Option		Description				
CAMERA	PRESET	Choose the channel with a speed dome camera connected, and choose a preset point you want the camera to move to.				
		To know how to set a preset point, please refer to "5.4 PTZ Control" at page 20.				
	AUTO TRACKING	Choose the channel with a speed dome camera connected, and the camera supports auto tracking.				
	CAMERA GUARD	Choose the channel with our brand's speed dome camera or motorized-pan camera connected, and enable this function to move the camera view to the preset point you specified.				
		To know how to use this function, please refer to "ADVANCED CONFIG" in "6.1.4 DETECTION" at page 25.				
	ENABLE MOTION	Choose at least one channel you want to enable motion detection.				
	ENABLE PIR	Choose the channel with our brand's PIR camera connected.				
I/O	RECORDER ALARM OUT	Choose to automatically activate the alarm-out device connected to the recorder.				
	CAMERA ALARM OUT	Choose the channel with our brand's IP camera connected, and an alarm-out device (such as a buzzer) is connected to the camera.				
		This option will automatically activate the alarm-out device connected to the camera.				
	BUZZER	Choose to activate the buzzer built in the recorder to alert you.				
MISC	DELAY	Set a timeout between each action.				

6.4 IVS

This function is available only when the connected IP camera supports this function.

				IVS				
	IVS MODE		DISPLAY LINE	SCENE CHANGE	Scene Change Ley		SENSITIVITY	
CH1	FLOW COUNTING	\sim	OFF	OFF	MIDDLE			«
CH2								
CH3	ONEWAY	\sim	OFF	OFF	MIDDLE	\sim		« .
CH4								

1) IVS MODE

Select one of the following three modes depending on your environment:

MODE	DESCRIPTION
FLOW COUNTING	A virtual detection line is set to detect the moving direction of pedestrians for flow counting.
VIRTUAL FENCE	A virtual detection line is set to detect intruders crossing the detection line, and an alarm will be triggered.
ONE WAY	A virtual detection line is set to detect intruders from the specified direction, and an alarm will be triggered.

2) DISPLAY LINE

Select to display the detection line for IVS on the screen or not.

3) SCENE CHANGE

Select **ON** to trigger a motion event when the camera is sensed to be moved and the camera scene is changed. At the same time, the icon "³/³ will be also shown on the screen in addition to the motion icon "³/³.

4) SCENE CHANGE SENSITIVITY

Set the detection sensitivity for **SCENE CHANGE** to **HIGH**, **MIDDLE** or **LOW**.

5) <u>SENSITIVITY</u>

Set the sensitivity for IVS from $0 \sim 15$. The larger the value, the more sensitive the IVS will be.

6) <u>DISPLAY LINE</u>

Select to display the detection line for IVS on the screen or not.

7) 💽 (Clear) & 🖉 (Edit)

Select Select set the flow counting number, and real to enter the setting page to set the detection line. For details, please refer to the next section, "IVS Application".

> FLOW COUNTING

Step1: Click of to enter the setting page and draw a detection line with your mouse, and decide the

detection direction by selecting **REVERSE**.

Step2: Click **APPLY** to finish the IVS setting and return to the live view.

When anyone walks across the detection line, the system will determine his movement is in or out, and add one count to the corresponding channel on the flow counting panel.

IN	People coming from the opposite direction to the arrow mark.
OUT	People coming from the same direction as the arrow mark.

VIRTUAL FENCE and ONE WAY

Step1: Click I to enter the setting page and draw a detection line with your mouse, and decide the

detection direction by selecting **REVERSE**.

Step2: Click $\ensuremath{\textbf{APPLY}}$ to finish the IVS setting and return to the live view.

When anyone walks across the detection line, the system will determine his movement is in or out, and:

VIRTUAL FENCE	An event happens for anyone walking across the detection line, and " will be shown on the screen.
ONE WAY	An event happens for anyone walking from the opposite direction to the arrow mark, and "" will be shown on the screen.

6.5 EXPORT

6.5.1 BACKUP

Note: Before using your USB flash drive for video backup, please format it to "FAT32" first with your PC or laptop. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST at page 61.

Note: Video backup could be made via a USB flash drive or the Internet. It's **NOT** allowed to connect the hard disk to your PC / laptop directly for it may impair the recorded data saved in the hard disk.

To copy recorded data for video backup, click \pm to add an item for backup. You can add several items to copy different data you need.

	BACKUP										
1 +											
	TIME	CHANNEL	BACKUP TYPE	total size	DEVICE	STATUS

		•		1								
											CANCEL	BACKUP

- Step1: In **SOURCE**, choose the data type (VIDEO or LOG) and the time range you want to copy from the calendar. The date with video recording will be shown in blue.
- Step2: In **CHANNEL**, choose the channel(s) you want.
- Step3: The video footage can only be saved to a USB device. Specify the where to save in the USB device in **STORAGE**.
- Step4: Choose **BACKUP** to start. The backup video will be in the AVI format.

6.5.2 SCHEDULE

This function is used to schedule video backup regularly, uploading security footages to a FTP site (remotely) or saving to an USB device connected to this device (locally).

You can configure up to 7 profiles and use one of them as your backup preference.

				В	ACKUF			
SOURCE						DESTINATION		
PROFILE			SCHEDULE	1 🗸		TARGET FTF)	\sim
ACTIVE			ON	<u> </u>		STORAGE		<u> </u>
RESOLUTION			RECORD S	IREAM 🗸		FTP PROFILE Pro	ofile1	\sim
EXECUTION PER	RIOD		DAILY	\sim		FTP PATH /V	DEO	
EXECUTION TIM	E			MON 01		_		
RANGE	Ν	10N 08 :	00 ~ FR	I 19 : 00				
		<u> </u>			-			
					7			
CHANNEL	ALL

		6						
	CH13	CH14	CH15	CH16				
	•	•		48				
							APP	'LΥ

Step1: In SOURCE, choose the profile you'd like to save all the settings configured in SOURCE. Choose the video resolution (SUBSTREAM / RECORD STREAM), how often and when you'd like the backup to execute (EXECUTION PERIOD / EXECUTION TIME), and the time which includes the recordings you want (RANGE).

- Step2: In **CHANNEL**, choose the channel(s) you want.
- Step3: In **DESTINATION**, choose where you want to save the data, in a USB flash drive (**USB DEVICE**) or on FTP (**FTP**).
- Step4: (Optional) If **FTP** is chosen in **DESTINATION**, go to **STORAGE**, and choose the profile you'd like to save the storage path configured in **FTP PATH**. Then, specify the directory where you'd like the recordings to be uploaded in **FTP PATH**.

Step5: Click **APPLY** to confirm.

6.5.3 REGULAR REPORT

This function is used to send event reports to the specified E-mail address. Users could configure up to 5 profiles to receive different reports about specific channels at different time.

Note: This function is available only when a hard disk is installed, and the recorder is connected to Internet.

					BACK	JP	
SOURCE						DESTINATION	
PROFILE			PROFIL	E1 🗸		EVENT TYPE	4 SELECTED
ACTIVE			ON				
EXECUTION F	PERIOD		WEEKL	Y	\sim	EDIT	E-MAIL ADDRESS
EXECUTION [DAY OF WEEK		MON				tech_support@gmail.com
EXECUTION H	HOUR		1		\sim	+

	СН13	CH14	СН15	CH16			
							APPLY

You can configure up to 7 profiles and use one of them as your backup preference.

Step1: In **SOURCE**, choose the profile you'd like to save all the settings configured in **SOURCE**. Choose how often and when you'd like to receive reports. Finally, make sure this profile is active

(ACTIVE to ON).

EXECUTION PERIOD	Select how often you want to receive reports: MONTHLY , WEEKLY or DAILY .
EXECUTION DAY OF MONTH /	Depending on the option you selected in EXECUTION PERIOD :
EXECUTION DAY OF WEEK	EXECUTION DAY OF MONTH shows when MONTHLY is selected.
	Select one date from 1 ~ 31 to reboot.
	EXECUTION DAY OF WEEK shows when WEEKLY is selected. Select
	one day from Monday ~ Sunday to reboot.

Step2: In **CHANNEL**, choose the channel(s) you want.

- Step3: In **DESTINATION**, choose which event type(s) you want to see (**MANUAL / MOTION / ALARM /** SYSTEM / TIMER / HUMAN DETECTION).

Step5: Click **APPLY** to confirm.

6.6 STORAGE

To copy recorded data for video backup, click \pm to add an item for backup. You can add several items to copy different data you need.

					S	TORAGE				
HDD NEARL	.Y FULL (GB		5							
HDD OVERH	HEAT ALERT	(°C)						70		\sim
OVERWRITE							·	ON		
KEEP DATA	limit(days)						OFF		\sim
TEMPERATU	RE TO ENA	BLE FAN						30		\sim
	ID	TYPE	STATUS	SIZE	TEMP.	SERIAL NUMBER	FREE SIZE	FORMAT TIME	HEALTH ST	ATUS
1	HDD 5-1	NORMAL	READY	750GB	33°C	WD-WCAV53797317	269.856GI	3 2017/07/18 23:03:52	GOOE)

1) HDD NEARLY FULL (GB)

If **HDD BUZZER** is enabled in **MAINTAIN**, select the duration time for buzzer notifications when the hard disk available capacity is 5/10/15/20 GB left.

2) HDD OVERHEAT ALERT (°C)

Select the temperature alert for your hard disk to be aware of the possible overheat of your hard disk.

3) OVERWRITE

Be defaults, the HDD overwritten function is set to ON, and $\mathbf{\overline{M}}$ will be shown on the screen.

4) KEEP DATA LIMITS (DAYS)

Assign how many days to save the recording data from **1** to **31** days. After the assigned day(s), the recorded data will be removed. Select **OFF** to disable this function.

5) TEMPERATURE TO ENABLE FAN

Choose the temperature (25 / 30 / 35 / 40) to enable the built-in fan to work for heat dissipation.

6) HDD information

You can check the remaining capacity of the connected hard disk in this device and its current status.

If the health status goes to:

- **GOOD** This hard disk works normal.
- BELOW AVERAGE The hard disk might work with some errors. Please pay attention and do video backup if needed.
- **REPLACEMENT NEEDED** Please replace this hard disk immediately to ensure continuous video recording.

7) <u>HDD details</u>

You can check the details of the selected hard disk.

8) HDD formation

Click to format the selected hard disk and erase all data. When a hard disk is inserted to the recorder for the first time, it's compulsory to format the hard disk for it to work properly.

9) D Mount / D Unmount HDD

HDD hot-swapping is supported for this device. There's no need to power off the device first to install or remove a hard disk.

When a hard disk is installed, you'll need to click I to manually mount the hard disk for it to work properly. When you need to remove a hard disk, click it to unmount the hard disk and you'll be able to remove it.

Note: It's not allowed to remove a hard disk without clicking first.

6.7 ACCOUNT

Note: This function is available only for SUPERVISOR.

6.7.1 USER LIST

This function is used to create a new user account, or modify or delete an existing account for different access privilege.

USER LIST									
EDIT	USER NAME	GROUP							
	admin	SUPERVISOR							
+									

How to create an account

Select \pm , enter a user name and its password, and assign a user group in which includes the access rights you wish to grand to this new account. Then, select **SAVE** to create and return to the user list page.

Note: Four user levels are pre-defined in the system for you to quickly choose: **SUPERVISOR, POWER USER, USER & GUEST.** For details about available operations of each level, please refer to "6.7 ACCOUNT" at page 41.

ADD						
USER NAME	TESTI					
PASSWORD	•••••					
CONFIRM PASSWORD	•••••					
GROUP	POWER USER	\sim				
		·				
SAVE	CANCEL					

6.7.2 GROUP

This function is used to create a new group with customized user access rights for different functions if needed, and you can create a user account and assign it to your customized group.

Note: The default user groups are **SUPERVISOR**, **POWER USER**, **USER** and **GUEST**, and they're not allowed to be removed. For details about available local operations of each user group, please refer to "6.7 ACCOUNT" at page 41.

			ВАСКИР

				APPLY

lcon	Meaning	Description
	Delete	Choose a customized user group and delete it. The default user groups (SUPERVISOR, POWER USER , USER and GUEST) can't be removed.
Ŧ	Add	Click to enter a group name, and select the tabs of GENERAL , LOCAL and NETWORK to choose the corresponding functions you want to enable or disable. Then, click APPLY to confirm.
Ċ	Import	You need to create a user group first to use this function. Choose one of the default user groups you want to modify for your customized group from the drop-down list and click I choose a customized group to import the configurations. Then, you can quickly modify the configurations and click APPLY to confirm.

6.8 NETWORK

There are two RJ45 ports on the rear panel: **WAN** and **LAN**.

- WAN is used to connect this recorder to Internet for remote access from anywhere as long as Internet access is available.
- LAN is used to connect to IP cameras locally.
- **DDNS** is used when the Internet access is available.

Note: For more details about these three functions and network configurations, please get the setup manual from

www.surveillance-download.com/user/network_setup/network_setup_recorder.pdf.

WAN	WAN	
LAN	NETWORK TYPE	STATIC 🗸 🗸
DDNS	IP	192.168.1.112

6.8.3 MULTICASTING

In this menu, users could configure the multicast address and port used for each channel for data streaming.

Three streams for different usage could be configured per channel. These are used for different video data requests from different clients.

				MUL	TICASTING				
TIMEOU	JT (SECS)							50	\sim
LIMIT TH	HE TRANSFERING	G OF THE RECORD	DING STREAM					2	\sim
									<u>ц</u>
	MULTICAST STREAM 1 ADDRESS	MULTICAST SREAM 1 PORT	STREAM 1 TIME TO LIVE(TTL)	MULTICAST STREAM 2 ADDRESS	MULTICAST SREAM 2 PORT	STREAM 2 TIME TO LIVE(TTL)	MULTICAST STREAM 3 ADDRESS	MULTICAST SREAM 3 PORT	STREAM 3 TIME TO LIVE(TTL)
CH1	239.0.0.1	9000	15	239.0.0.2	9002	15	239.0.0.3	9004	15
CH2	239.0.0.1	9006	15	239.0.0.2	9008	15	239.0.0.3	9010	15
CH3	239.0.0.1	9012	15	239.0.0.2	9014	15	239.0.0.3	9016	15
CH4	239.0.0.1	9018	15	239.0.0.2	9020	15	239.0.0.3	9022	15

1) TIMEOUT (SECS)

Set the timeout in second for transmission attempt in second for this channel, after which the attempt will be down. The options are: **10** / **20** / **30** / **50** / **120** / **240** / **300**.

2) LIMIT THE TRANSFERING OF THE RECORDING STREAM

Set the number of how many record streaming could be transferred at the same time.

3) MULTICAST STREAM ADDRESS

Configure the addresses used for the three streams per channel.

The address range for multicasting is from 224.0.0.0 to 239.255.255.255.

Note: The address for each stream per channel should be unique and can't be the same as other stream in the same channel or other channel.

4) MULTICAST STREAM PORT

Set the event recording function on / off.

Configure the ports used for the three streams per channel.

The port range is from 1 to 65535.

Note: The port for each stream per channel should be unique and can't be the same as other stream in the same channel or other channel.

5) TIME TO LIVE(TTL)

Set the connection time in second for each stream from $1 \sim 999$.

6.8.4 EaZy

This function is used to connect this recorder to Internet by using EaZy Networking. For details, please refer to "APPENDIX 7 EAZY NETWORKING" at page 65.

EaZy	
ENABLE EAZY NETWORKING	ON
000E532B8613	

6.9 TIME

TIME SI	ETUP
DATE	2009 / NOV / 17
TIME	15:35:53
FORMAT	Y/M/D
NTP SERVER	Pool.ntp.org
SYNC PERIOD	DAILY
GMT	(UTC+08:00)TAIPEI
CLIENT TIME SYNC VIA NVR WAN	OFF

1) <u>DATE</u>

Set the current date. The default display format is YEAR – MONTH – DATE (**Y-M-D**).

2) <u>TIME</u>

Set the current time in HOUR : MIN : SEC.

3) FORMAT

Set the time display format: Y/M/D, M/D/Y or D/M/Y.

4) <u>NTP SERVER</u>

Click to change the default NTP server to another server they're familiar with, or keep the default NTP server.

5) <u>SYNC PERIOD</u>

Select to synchronize the device time every day (DAILY), or turn this function off (OFF).

6) <u>GMT</u>

Select your time zone.

7) CLIENT TIME SYNC VIA NVR WAN

Enable this function to synchronize the time of the connected IP cameras via the NVR when the NVR is connected to the Internet. This could ensure the time of the NVR and IP cameras are the same to prevent the confusion of time inconsistency.

Note: You may receive NTP-based DDoS attacks when this function is enabled. Please make sure your network is secured to prevent this kind of attack.

6.10 DISPLAY

D	ISPLAY	
CHANNEL TITLE	ON	
EVENT STATUS	ON	
HDD DISPLAY MODE	RE, MAINING SIZE	\sim
DISPLAY OUTPUT	AUTO	\sim

HDMI2 DISPLAY	SETUP	
COMPOSITE OUTPUT	SETUP	

1) CHANNEL TITLE

Select to display the channel title or not (ON / OFF).

2) EVENT STATUS

Select to display the event icons or not (ON / OFF).

Note: For details about each event icon, please refer to "4.3 Status & Operation" at page 14.

3) HDD DISPLAY MODE

Select **REMAINING SIZE** to show the remaining HDD capacity for recording in GB, or **REMAINING TIME** to show the remaining recording time.

4) DISPLAY OUTPUT

Select the display resolution you want. The default value is **AUTO**. This is used for the main display output.

Note: To have the best image quality on your monitor, make sure (1) the selected output resolution is supported by your monitor, and (2) the output settings on both the LCD monitor and the recorder are consistent.

If the image is not positioned or scaled properly, please go to your monitor's menu for adjustment. For details, please refer to the user manual of your monitor.

- 5) <u>LANGUAGE</u> Select the language of the OSD.
- 6) <u>HDMI2 DISPLAY</u>

Specify how the second HDMI port is used for video output: **CALL MONITOR / EVENT MONITOR / LIVE**.

CALL MONITOR is used for sequence display. When this option is selected, go to CALL SCREEN DURATION to select the duration time in second (03 / 05 / 10 / 15) and CALL MONITOR PERMIT to choose the channel(s) you want for sequence display.

6.12.1 SYSTEM

SYSTEM	
BACKUP CONFIG	SUBMIT
RESTORE CONFIG	SUBMIT
RESET DEFAULT	SUBMIT
DEVICE TITLE	nvr_1
ENABLE AUTO PLUG AND PLAY	ON
BIND MAC ADDRESS	OFF

1) BACKUP CONFIG / RESTORE CONFIG

To save the DVR current configurations for later use, such as restoring after DVR upgrade or applying to another DVR, insert a compatible USB flash drive into the USB port, and select SUBMIT in **SUBMIT** in **BACKUP CONFIG** to copy the current DVR configurations to a file "System.bin" and save to your USB flash drive.

To restore the DVR configurations, insert the USB flash drive including "System.bin" to the USB port, and select **SUBMIT** in **RESTORE CONFIG**.

2) RESET DEFAULT

Click **SUBMIT** to reset all settings or partial settings to their factory default values, and select **YES** to confirm or **NO** to cancel. The system will reboot after reset.

3) DEVICE TITLE

Enter a title for this device.

4) ENABLE AUTO PLUG AND PLAY

Switch to **ON** to allow the camera to be detected and configured automatically when it's connected to this device.

Note: This function is available only when the brand of the cameras connected is the same as this device.

5) BIND MAC ADDRESS

This function is recommended to be used when your surveillance system is more than 256 cameras. It would be helpful for the system to get the address of each connected camera quickly if the system accidentally shuts down and needs to recover.

6.12.2 UPGRADE

In this menu, you can choose to upgrade your recorder (**LOCAL**) or the connected our brand's IP cameras (**CAMERA**).

LOCAL

Save the upgrade files obtained from your installer or distributor in a compatible USB flash drive, and insert it into the USB port. Then, click **SUBMIT** to start upgrading.

Note: Before using the USB flash drive, please use your PC to format the USB flash drive to FAT32 format first. For the list of compatible USB flash drives, please refer to "APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST at page 61.

UPGRADE				
LOCAL	CAMERA			
UPGRADE		SUBMIT		
VERSION		1002-1001-1001-1000		

<u>CAMERA</u>

You can choose to upgrade several connected IP cameras from the recorder as long as the cameras are our brand's IP cameras.

			UPGRADE				
LOCAL	CAMERA						
CHANNEL	VERSION		DIRECTORY		STATUS		
CH1	1085-1032-10)46-1020-A1A1	/mnt/usb/FullImg-1086-1033-10	046-1020.bin		[
CH2	10205-10075-	10115-10095				[+
CH3						[+
CH4						[+
				UPG	RADE	COPY TO	\sim

Step1: Save the upgrade files obtained from your installer or distributor in a compatible USB flash drive, and insert it into the USB port.

Step2: Choose 🛨 to browse to where the firmware file is saved and choose the file to upgrade. Then, choose **SELECT** to confirm and return to the upgrade page.

()			USB DEVIC	E	\sim	
NAME	SIZE	TYPE		MOD	IFIED [DATE
FullImg-1086-1033-1046-1020.bin	27.6MB	regular file		2017-	07-13	12:19:32
FullImg-1022-1007-1011-1009.bin	9.6MB	regular file		2017-	-08-16	17:05:16
			CANCEL		SE	LECT

Step3: Repeat Step2 as many as needed until all cameras which need firmware upgrade are selected. If one firmware file applies to several IP cameras, select **COPY TO** to apply the same file to the applicable cameras.

Step4: Choose UPGRADE to start upgrading all selected cameras, or choose D to upgrade the camera one by one.

6.12.3 ALERT

ALERT		
EXT. ALERT	OFF	
INT. BUZZER	ON	
KEY BUZZER	ON	
VLOSS BUZZER	ON	
MOTION BUZZER	ON	
ALARM BUZZER	ON	
HDD BUZZER	ON	
ALARM BUZZER DURATION (SEC)	10	\sim

1) EXT. ALERT

Select to enable or disable the sound when any external alarm is triggered (ON / OFF).

2) INT. BUZZER

Select to enable or disable the sound (ON / OFF) for all internal buzzers: KEY BUZZER, VLOSS BUZZER, MOTION BUZZER, ALARM BUZZER, and HDD BUZZER.

Note: When this item is set to OFF, item 3) to item 7) will be disabled even though they are set to ON.

3) <u>KEY BUZZER</u>

Select to enable or disable the sound when pressing the buttons on the front panel (ON / OFF).

4) VLOSS BUZZER

Select to enable or disable the sound when video loss happened (ON / OFF).

5) MOTION BUZZER

Select to enable or disable the sound when any motion alarm is triggered (**ON** / **OFF**).

6) <u>ALARM BUZZER</u>

Select to enable or disable the sound when any internal alarm is triggered (ON / OFF).

- <u>HDD BUZZER</u>
 Select to enable or disable the sound (ON / OFF) when the HDD remaining capacity reaches to the value set in HDD NEARLY FULL (GB).
- ALARM BUZZER DURATION (SEC) Select the duration time for alarm buzzer in second (5 / 10 / 20 / 40).

6.12.4 EVENT LOG

You can check all the event information (event type, time and channel), or clear all log records.

EVENT LOG						
EVENT	TIME	CC	MMENT			
KEY UNLOCK	2011/NOV/19 15:49:0	07				
VIDEO LOSS	2011/NOV/19 15:32:0	2011/NOV/19 15:32:05 04				
POWER ON	2011/NOV/19 15:32:0	2011/NOV/19 15:32:02				
	PREV	NEXT	CLEAN			

6.12.5 ONLINE

ON	LINE
ANONYMOUS VIEWER LOGIN	OFF
DROP ALL CONNECTION	SUBMIT
LOGIN FAILURE TIMES	3 🗸
LOCK TIME FOR LOGIN FAILURES	10 MINS 🗸

1) ANONYMOUS VIEWER LOGIN

Switch to **ON** to allow anonymous login, meaning there's no need to enter user name and password for remote access.

2) DROP ALL VIDEO CONNECTION

Click **SUBMIT** to force disconnection of all remote logins when needed.

3) LOGIN FAILURE TIMES

The recorder will lock the IP address with several login attempts. Choose the failure times of login attempts from the same IP address ($1 \sim 20$), and go to the next option, **LOCK TIME FOR LOGIN FAILURES**, to choose how much time you'd like to lock the IP address.

4) LOCK TIME FOR LOGIN FAILURES

Choose how much time you'd like to lock the IP address with several login attempts but failed (1 MIN / 2 MINS / 3 MINS / 5 MINS / 10 MINS / 30 MINS / 1 HOUR).

6.13 POWER CONTROL

Click to show the power off panel to halt, reboot or log out the system.

lcon	Meaning	Description
٢	System Halt	Click to stop the system and remove the power adapter.
Ú	System Reboot	Click to reboot the system.
C	System Logout	Click to log out the system and log in with another account.

6. REMOTE OPERATION

You can also control this recorder remotely via the web browser and iOS / Android devices.

6.2 Web Browser

You can view the images or operate your recorder with a web browser, for example, Microsoft Internet Explorer.

Note: The supported PC operation systems are Windows 10, Windows 8, Windows 7 and Windows Vista.

The user interface when you access via the web browser is nearly the same as the interface you see on the recorder, and the operations are also the same.

Note: The illustration below is just for your reference and may be different from what you actually see. Some functions and buttons are for selected models or certain user levels only.

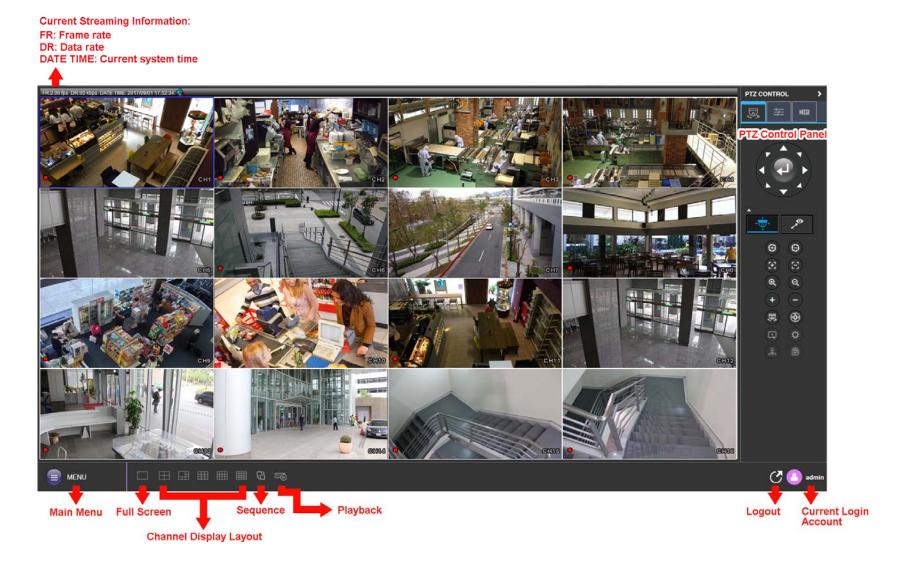

Step 1: Key in the IP address used by this device in the URL address box, such as 60.121.46.236, and press Enter. You will be prompted to enter the user name and password to access the device.

If the port number this device used is NOT 80, you need to key in the port number additionally. The format is *ipaddress:portnum*.

For example, for the IP address 60.121.46.236 and port No. 888, please key in "http://60.121.46.236:888" into the URL address box, and press "Enter".

Step 2: Enter the user name and password, and click "OK". You will see a similar screen as the following when the login information is correct.

Note: The default user name and password for remote access are both "admin".

6.3 Mobile Devices

Note: For more details about mobile surveillance via your mobile device, please visit http://info.eagleeyes.tw/iphone/index.html.

EagleEyes is a mobile phone program used with our surveillance system for remote surveillance. It's compatible with iOS and Android mobile devices, and it's free (Except *EagleEyes Plus* for iOS OS, and *EagleEyes Plus*+ for Android OS).

6.3.1 Prerequisites

Before installing EagleEyes to your mobile phone for remote surveillance, make sure you have checked the following:

- ✓ Your mobile platform is iOS or Android.
- ✓ Mobile Internet services are subscribed and available to use for your mobile device.
- **Note:** You might be charged for Internet access via wireless or 4G networks. For the Internet access rate details, please check with your local network operator or service provider.
 - ✓ You have noted down the IP address, port number, user name and password used to access your network camera from Internet.

6.3.2 Where to download

Go to App Store / Play Store from your iOS / Android mobile devices and search EagleEyes to download.

When the download is completed, *EagleEyes* will be installed automatically to the location where all applications are saved in your phone by default, or where you specify.

6.3.3 Setup

- Step1: Open EagleEyes to go to the address book.
- Step2: Then, click **Add** and select **Manual** to go to the setting page.

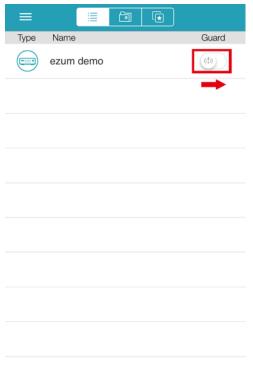

Туре	Name				Ļ	Guard

APPENDIX 2 PUSH VIDEO CONFIGURATION

A2.1 Alarm Sensor Connection

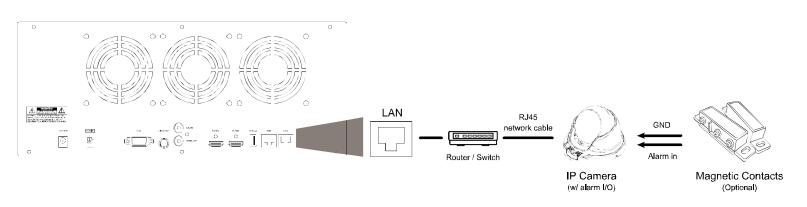

Connect the alarm sensor, such as magnetic contacts, to the alarm-in port on the rear panel. Alarm-in 1 corresponds to video channel 1, alarm-in 2 corresponds to video channel 2, and so on.

Note: The voltage restriction for alarm-in device connection is under DC24V 1A.

If the connected IP camera is our brand's IP camera with alarm I/O support, you can also connect the alarm sensor to the camera.

Note: Please check the user manual of the camera to know voltage restriction for alarm-in device connection.

Then, go to **MENU > CAMERA > DETECTION** and make sure:

- 1. MOTION is set to **ON**.
- 2. ALARM is configured (N.C. / N.O.) when an external alarm device is connected, or **INTERNAL ALARM** is set to **ON** when the connected camera has a PIR sensor built-in.

DETECTION							
CHANNEL TITLE	ALARI	М	INTERNAL ALARM	SENSITIVITY	MOTION	AREA	ADVANCED CONFIG
CH1	OFF		ON		ON	EDIT	
CH2	N.C.		OFF		ON	EDIT	
CH3	N.O.		OFF		OFF	EDIT	
CH4	OFF		OFF		OFF	EDIT	
	<u> </u>						APPLY

A2.2 Configuration

Before configuring Push Video, make sure:

- 1. The system is set up as described in "2. CONNECTION" at page 3.
- 2. This recorder is connected to Internet.
- 3. You've installed the app, EagleEyes, on your iOS or Android mobile devices. For details, please refer to "6.3 Mobile Devices" at page54.
- Step1: Go to **MENU** \rightarrow **SCENARIO**, and enable the necessary rules:

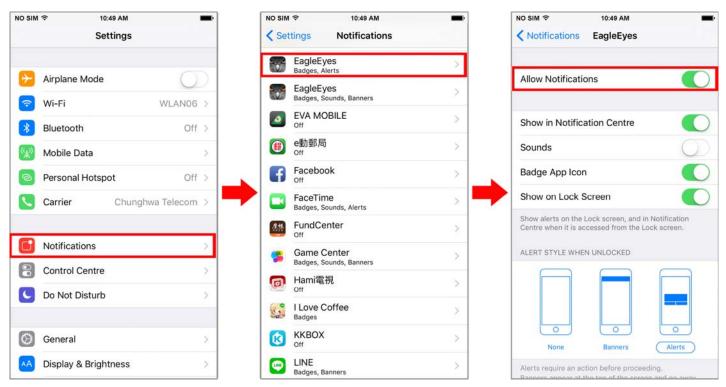

If your alarm sensor is	Please enable
External alarm sensor	1. PUSH VIDEO TRIGGERED BY EXTERNAL ALARM
	2. MOTION DETECTION ON WHEN GUARD ON
PIR sensor built-in	1. PUSH VIDEO TRIGGERED BY BUILT-IN PIR SENSOR
	2. MOTION DETECTION ON WHEN GUARD ON
	3. INTERNAL ALARM (PIR) DETECTION ON WHEN GUARD ON

Step2: Open EagleEyes, and add this recorder to the EagleEyes address book.

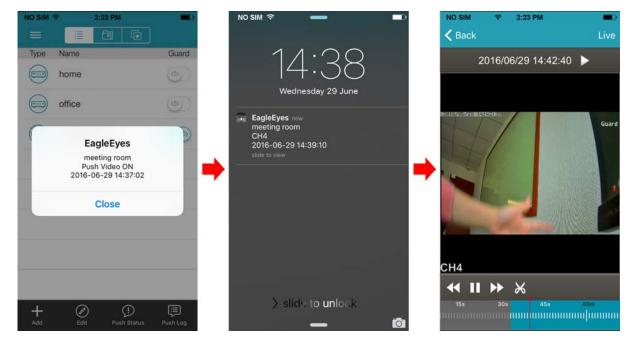

A2.3 Enable Push Video

A2.3.1 From iOS Mobile Device (iPhone / iPad)

Step1: In the iPhone / iPad main menu, select **Settings** → **Notifications**. Select **EagleEyes**, and make sure the notification is set to on.

- Step2: Open **EagleEyes**, and switch **Guard** to **ON**. You'll receive the message indicating that Push Video is on.
- Step3: Return to the main page or standby page. You'll receive event notifications when there's an alarm event. Follow the on-screen instruction to immediately play the recorded clip.

- A2.3.2 From Android Mobile Device
- Step2: Open **EagleEyes**, and switch **Guard** from **OFF** to **ON**. You'll receive the message indicating that Push Video is on.
- Step3: Return to the main page or standby page. You'll receive event notifications when there's an alarm event. Follow the on-screen instruction to immediately play the recorded clip.

APPENDIX 3 COMPATIBLE USB FLASH DRIVE LIST

Please upgrade the firmware of the recorder to the latest version to ensure the accuracy of the following table. If the USB flash drive is not supported by the recorder, you will see *** on the screen.

Note: Please use your PC to format the USB flash drive as "FAT32".

Note: You can backup up to 2GB video data for one-time USB backup. To backup more data, please set the time & channel(s) you want, and start USB backup again.

APPENDIX 4 COMPATIBLE HARD DISK LIST

Please upgrade the firmware of the device to the latest version to ensure the accuracy of the following table.

Note: It's necessary to install a hard disk first before firmware upgrade to ensure the upgrade process works properly.

Note: To use a green hard disk, use **ONLY** the hard disk designed especially for surveillance to ensure the device works properly.

* To know more details about SRS and its related support and service, please contact your local Seagate representative directly.
 ** Please be advised to pay attention to the heat dissipation of the hard disk which is over 4TB because it might generate much heat during operation. It's recommended that ambient temperature is not over 35°C.

APPENDIX 5 BATTERY REPLACEMENT

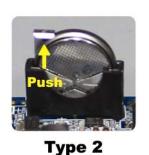

The time reset after power failure, for example, caused by a power outage, will cause the disorder of the recorded data, and users may have problems in searching the event clip they want. To keep the device time from resetting, a non-chargeable lithium battery, *CR2032*, is installed in the device.

However, the device time might still get reset when the battery is low or even running out of power. If so, please replace the device battery, CR2032, **right away** as instructed below.

How to replace CR2032

- **Note:** The lithium battery, CR2032, is a non-chargeable battery, and should be purchased separately. Please replace only with the same or equivalent type battery in case of danger.
- Step1: Stop all recording **immediately** to prevent the disorder of the recorded data. Then, back up the recorded data if necessary.
- Step2: Power off the device, and disconnect the power.
- Step3: Remove the device upper cover or rear panel to find the battery on the mainboard.
- Step4: Push the release as indicated below to remove the battery.

Type1

Step5: Get a new battery and install it to its slot on the main board.

- For Type 1, install it with the side of "CR2032" facing up as shown above.
- For Type 2, install it without the side of "CR2032" facing you as shown above.

Step6: Replace the cover and connect to power.

Step7: Set the date & time, and resume recording.

APPENDIX 6 DISK ARRAY COMPATIBLE LIST

Here's the compatible list for disk arrays.

Note: For the compatible hard disks used for those disk arrays listed below, please check their respective user manuals or official websites.

Brand	Model Number
Proware	EP-D501-AA
	EP-2123-UA-R
RAIDON	GT1650-SB3
	GR3630-SB3
STARDOM	DR5-WBS3

APPENDIX 7 EAZY NETWORKING

EaZy Networking is a free P2P cloud service to connect AVTECH devices to the Internet automatically by plug-and-play, enabling you to check the live view via your mobile device or laptop at anytime.

In most cases, the device is connected via P2P. Connection via the relay server is only applied to some complex environments such as the private IP-based network environment used by a large enterprise. There is no speed limitation of P2P connection. For connection via the relay server, the speed is up to 10FPS@512kbps. To obtain stable transmission, it's recommended to purchase our data plan of 1GB or 7GB. Each device will enclose a 2GB data plan for a free trial.

EaZy Networking could be configured via EagleEyes on an iOS / android device, or via Internet Explorer.

Before using this function, make sure:

- This recorder is connected to a switch or router, and the switch or router is ready for Internet connection.
- The network icon on the bottom right corner is \square , not \square .
- You have an iOS / Android mobile device with EagleEyes installed.

A8.1 Via EagleEyes on iOS / Android Device

A8.1.1 Setup

Note: If the setting is made via the Setting Wizard, the network type will be automatically switched to DHCP.

Step6: Click """ in the section of "MAC address" to open the QR code scan page, and scan the QR code on the DVR screen mentioned in Step2. The MAC address will be filled automatically.

Fill in the Captcha code manually, and click "Apply".

Step7: Follow the on-screen instruction to finish the rest of the settings, and see if this device is added successfully to the address book as a cloud device.

At the same time, you'll be prompted to confirm if you want to remove the default user name and password.

- When the default user name and password are removed, you can **ONLY** use the user name and password of the cloud service to access this recorder locally and remotely. If you forget the user name and password of the cloud service, you could only reset the recorder and do all configurations again.
- When the default user name and password are kept, other people might be able to access this recorder if they know the default user name and password of this recorder.

Confirm if you want to keep the default account to continue, and return to the address book. You'll see the newly-added device in the address with a cloud icon on it.

Step6: Check again the configurations you made for the account to which you want to share your cloud device, and select "Share!" to confirm.

Step7: (Optional) Configure the data allowance shared to other accounts to use.

- Step8: Return to the address book of EagleEyes. You'll see the device being shared is marked with an icon of two people.
- A8.2 Via Internet Explorer on PC / Laptop

Note: EaZy Networking setup via a web browser is only available on Internet Explorer.

A8.2.1 Setup

Step1: Go to **MENU** \rightarrow **NETWORK** \rightarrow **WAN**. Set **NETWORK TYPE** to **DHCP**, and make sure the network

icon on the bottom right corner is changed from 2 to 3.

Note: If the setting is made via the Setting Wizard, the network type will be automatically switched to DHCP.

WAN	WAN	1
LAN	NETWORK TYPE	DHCP 🗸 🗸
DDNS	IP	192.168.1.112
E-MAIL	GATEWAY	192.168.1.254
FTP	NETMASK	255.255.255.0
MULTICASTING	PRIMARY DNS	168.95.1.1
EaZy	secondary dns	139.175.55.244
	PORT	88
	INTERNET AVAILABILITY ADDRESS	www.google.com
	MAC 00:0E:53:00:13:77	

Step2: In the same menu, select **EaZy**. Enable EaZy Networking, and leave this page open. You'll need to scan the QR code later.

EaZy		
	000E532B8613	

Step3: Open Internet Explorer on a PC / laptop, and enter https://ez.eagleeyes.tw.

In the login page, register an account for "Cloud Service". If you've got an account, please just log in.

Step4: Click + on the left pane, and you'll be prompted to install plugins: *EaZy Control* and *EaZy Wizard*. Please follow the instructions to install these two plugins to ensure the service works properly.

Note: If you're not prompted to install the plugin, please lower the security level of Internet Explorer, and try to log into the cloud service again.

Step5: Enable EaZy Wizard, and click "Start" to go to the login page. Log into the cloud service.

8	EaZy Wizard	× (1)	EaZy Wizard	×
EaZy Wizard		English 💟	ud Service	
	P.W 3.00 a.w. z	Start		Register

Step6: Select the recorder picture, or choose "DVR / NVR" on the bottom right corner. Then, enter the MAC address you wrote down in Step2, and the security code.

Click "Apply" to continue.

Which device typ	e do you have?	Account : freuen	Key in MAC	address of your device	Account : freuen
	((· · ·))	Wireless model DVR/NVR		WWWWWWWWWWWWWWWWWWWWWWWWWWWWWWWWWWWW	ල Back Apply

Step7: When your device is found, you'll be directed to the next page to change the device title if you want.

Note: The device name changed here will be fixed and can't be changed later.

Click "Apply" to continue. You'll be prompted to confirm if you want to remove the default user name and password.

- When the default user name and password are removed, you can ONLY use the user name and password of the cloud service to access this recorder locally and remotely. If you forget the user name and password of the cloud service, you could only reset the recorder and do all configurations again.
- When the default user name and password are kept, other people might be able to access this recorder if they know the default user name and password of this recorder.

Confirm if you want to keep the default account, and click "Apply" to continue and return to the main page.

A8.2.2 Checking Remaining Data Allowance

Step1: Log into the cloud service.

Step2: Select "Account Information" on the top right corner to go to account information, and select "Available Data Allowance".

Account Information Payment L	Log Usage Log Available Data Allowance
Available Data Allowance: Private Data Allowance: Shared Data Allowance: Connection limit time(Relay):	0 KB
0.000.000.000.000.000.000.000.000.000	
Device title	Available Data Allowance
DVR	1.82 GB
IPCAM	0 KB

A8.2.3 Sharing Cloud Device Access to Other Account(s)

Note: One cloud device could be shared up to 30 cloud accounts, but the access to the device might be failed because it is still restricted to the maximum online user setup of the device.

Step1: Log into the cloud service.

Step2: Select "Buddy Share" to go to the buddy sharing page. Then, choose the tag "Your own device(s)", and select "Share With Buddy".

A	Married Married A	[Part of the second second second	
Available Data Allowance	Your own device(s)	Device(s) being shared with you

OVR			
	chara and	- West Product	
	Close Sha	re With Buddy Edit	

Step3: Choose the cloud device you want to share, and click "Next" to enter the cloud account or the E-mail registered by the account you want to share with. Then, select "Add".

Step4: Check again the account to which you want to share your cloud device.

To add more accounts, select "Add"; to remove the existing account, select "Delete"; to continue buddy setup, select "Next".

Step5: Specify the access permission of the specified account, which account's data allowance should be consumed after access successfully, and how long the account is allowed to stay after access successfully.

> Who should pay data allowance:

Who should pay data allowance	The order to consume data allowance	
I	The free data allowance provided by the device -> The additional data allowance shared to other account(s) by the owner -> The additional data allowance of the device's owner -> The data allowance shared to other account(s) by the buddy	
Buddy	The additional data allowance of the buddy -> The data allowance shared with other account(s) by the buddy	

- **Note:** When there's no data allowance to use, the network transmission will be down to 1 FPS. To restore the fluency of live view, users need to subscribe a data plan from EagleEyes, or configure the network settings by themselves.
 - Step6: Check again the configurations you made for the account to which you want to share your cloud device, and select "Share!" to continue.
 - Step7: (Optional) Configure the data allowance shared to other accounts to use.

Step8: Return to the main page. You'll see the device being shared is marked with an icon of two people.

A8.3 Icons

lcon	Color	Indication
	Teal	This device is a DVR or NVR.
L	Blue	This device is a DVR or NVR.
, J	Orange	This device is an IP speed dome camera.
?	Red	This device is disconnected and unidentified.
Cor	Depending on the device color	This device is configured to the Internet via EaZy Networking (AVTECH Cloud Service).
		The cloud icon will be grayed out if the EaZy server can't be connected.
*	Depending on the device color	You've shared the access right of the device with other cloud account via Buddy (AVTECH Cloud Service).
		The icon will be grayed out if you disable the device share.
0	Depending on the device color	The icon will be grayed out if the device share is disabled by the owner of the device.

For example, if you see as the device type, you'll know:

- This device is an IP camera.
- This device is connected to the Internet via EaZy Networking.
- You were shared with the access right of the device, but the device share is disabled now.
